ACKNOWLEDGEMENTS

The studies and chapters in this thesis would not have come to be without the help, support and encouragement of many people to whom I am very grateful. I would like to take this opportunity to make special mention of the following:

Liverpool School of Tropical Medicine, United Kingdom

Professor Bernard Brabin, as the initiator of this study, for pointing me in the direction of different very interesting subjects and for all his support, encouragement and feedback. Without him this PhD would not have come to be.

Greg Harper for helping me to get all the materials and equipment ready for the initial study and for all the other help and support he gave me during the laboratory study.

Rick Young for all his help and for his preparedness with the fire extinguisher when I was doing my cooking experiments.

Jean Taylor for her help just when it was most needed at the end of the Master of Tropical Medicine Course. Further for all her willingness and help throughout my work to complete this thesis.

Dr L. Cuevas for teaching and helping me how to use Epi Info and how to do all those terrible statistical tests.

All people working in the library of the Liverpool School of Tropical Medicine for their support and willing ear for the stories and frustrations throughout the year when I completed my Master of Tropical Medicine Course.

Institute of Food Research, Nutrition Division, United Kingdom

Professor Sue Fairweather-Tait for her willingness to help with the laboratory study with the iron pots, for which she allowed me to do, free of charge, iron content determinations of the meals I prepared during my cooking experiments. Further for her constructive comments and involvement in the writing of the article.

Dave Hart for doing the laboratory determinations and for his willingness to always listen to my questions and queries and to answer them.

College of Medicine, Blantyre, Malawi

Professor Broadhead for the help and support he gave during my field study in Malawi.

Chikwawa District, Malawi

Angela Hogg for helping me to get settled in Malawi and meet the right people Team members: Redge Chataika, Chipiliro Masinthe and Medson Matchaya. For all their dedication and patience with me and the village people.

Medson Matchaya for his willingness to do another survey to determine the long-term acceptability of cast iron pots.

Fred Bequite for his help and support in selecting the villages and explaining the research to the people.

The Bush Hospital Foundation for providing me with transportation.
Sugar Co-operation of Malawi (Nchalo)

The Management for allowing me to use accommodation on the sugar estate.
Pat & Mike Whitbread for the hospitality they gave me, making me feel at home far away from home.
Mandy Nancy for being so kind that I could bother her daily for the key of the laboratory.
Ian Rathbone for supplying me with “dry ice” to keep my samples (and me) cool.
Graham Sutherland for all the work he has done to track down the supplier of the cast iron cooking pots.
Rita Leitao for all the nice support she gave me and especially for giving me the vital connection with “The internet” which allowed me to keep my relationship with my girlfriend Christa going in such a successful way that I am now married to Christa.
Dr Albert Mkumbwa for giving me permission to use the laboratory and supply me with the necessary medication.
Dave Harrison for the accommodation he provided for me during my stay in Malawi.

The Netherlands

My wife and soul mate, Christa, for all her love, support and encouragement she gave me throughout the years, for believing in me no matter what.
My parents for giving me the opportunity to go to the Liverpool School of Tropical Medicine and do the Master in Tropical Medicine Course, and for their continuous support.
My sister and brother for their support and help throughout the years.
Wiebe Knecht for being such a good friend with all his encouragement and wise council.
