Acknowledgments  

1 Introduction  
1.1 Major Requirements in terms of Information Management  
1.2 Application Cases: an Overview  
1.3 Thesis Contribution  
1.4 Organization of the thesis  

2 Information Integration Approaches, Mechanisms, and Tools  
2.1 Introduction  
2.2 A Taxonomy for Information Integration  
2.2.1 Distributed Systems  
2.2.2 Integrated Systems  
2.3 Further Classifications and Categorizations  
2.4 Discussion  

3 WATERNET: Intelligent Supervision and Control in Heterogeneous and Distributed Application  
3.1 Introduction  
3.2 Water Environment and General application requirements  
3.2.1 Water Network Structure and Management  
3.3 Information Management Approach  
3.3.1 The WaterNet Architecture  
3.3.2 Simple Scenario for Subsystems interaction  
3.4 Distributed Information Management System (DIMS)  
3.4.1 The PEER Federated Layer  
3.4.2 Schemas Management in WATERNET Using PEER  
3.5 Extended Integration Approach  
3.5.1 Data Adapters Supporting Openness  
3.5.2 The WATERNET System Implementation  
3.6 Conclusion and Discussion  
3.6.1 Major Characteristics and Benefits of Federated Approach in Waternet  
3.6.2 Contribution to GFL2S
4 MegaStore: Advanced Web Databases for Music Industry 51

4.1 Introduction .................................................. 51
4.1.1 E-Commerce Applications: Attempts and Aims .......... 52

4.2 Problem Analysis and Required High Level Architecture ........................................ 52
4.2.1 Database Design ............................................ 53
4.2.2 ODL Schema definition .................................... 55

4.3 The MegaStore System Architecture ........................................ 57
4.3.1 The Internet-Shop Interface ................................ 58
4.3.2 The Shop-in-a-Shop Interface ............................... 58
4.3.3 Server Architecture Extension .............................. 59

4.4 Music Audio and Video content .................................. 60
4.4.1 Bandwidth and Encoding Algorithm ........................ 60
4.4.2 Data Volume Estimation ..................................... 61

4.5 Music Data Manipulation ......................................... 62
4.5.1 Objects Loading Strategies .................................. 62
4.5.2 Extensions .................................................. 65
4.5.3 Database Administration .................................... 66

4.6 MegaStore Interfaces - Advanced Features ........................................ 67
4.6.1 Dynamic Browsing .......................................... 69
4.6.2 Ordering System ............................................ 70
4.6.3 System Security ............................................. 71
4.6.4 Current Implementation Status .............................. 72

4.7 Derived Applications ........................................... 73
4.7.1 LuisterPaa Interface ......................................... 73
4.7.2 Music Sheet Application ..................................... 75

4.8 Conclusion and Discussion ........................................ 78
4.8.1 Major Characteristics and Benefits provided to MegaStore Application .... 79
4.8.2 Contribution of the MegaStore’s Information Management Approach to GFI2S .......... 80

5 Information Management for Scientific Applications 81

5.1 Introduction .................................................. 81
5.2 Virtual Laboratory Architecture Design ........................................ 82
5.2.1 The VL Information Management for COoperation - VINCO Module ........ 85

5.3 Multi-Media Scientific Data Sets Manipulation ........................................ 85
5.3.1 Storage of Large Scientific and Engineering Data Sets 87
5.3.2 Scientific Data Archiving and Cataloguing Using Dublin Core Standard .......... 93

5.4 Universal Database Access - Based on Standards ........................................ 99
5.4.1 Database Connection Module ................................ 102
5.4.2 Query Execution Module .................................... 102
5.4.3 Results Presentation Module ................................ 102
5.4.4 Object Creation Module ..................................... 103
5.4.5 Further Benefits ............................................. 103

5.5 Data Access Security and Information Visibility (Safe/Reliable Data Export) .......... 105
5.5.1 Role-based Access Control Definition ........................ 106
5.5.2 Flexible Role-based Access Interface ........................ 108

5.6 Physical Database Performance Analysis ........................................ 109
5.6.1 Specific Functions to Access Binary Large Objects (Blobs) 110
5.6.2 Benchmarking Tests For Matisse Database System 110
5.6.3 Observations 112
5.6.4 Lessons Learned 112
5.7 Conclusion and Discussion 112
5.7.1 Contribution to GFI2S 113

6 GFI2S - Generic and Flexible Information Integration System 115
6.1 Introduction 115
6.1.1 Focus of GFI2S 117
6.2 GFI2S Information Integration Approach 119
6.2.1 Local Adaptation Layer (LAL) 122
6.2.2 Node Federation Layer (NFL) 125
6.2.3 Application of Database Standards and Middleware Solutions in GFI2S 144
6.2.4 GFI2S in Action 145
6.3 Conclusion 147

7 Conclusions and Future Work 149
7.1 Overview 149
7.2 GFI2S Compared to Other Approaches 152
7.3 Lessons Learned 153
7.4 Future Work 154

A Application of Database and Middleware Standards in FGI2S 157
A.1 Object-Oriented Standards and Extensions Adaptation for GFI2S 157
A.1.1 Object Definition Language - ODL 158
A.1.2 Query Languages - SQL, SQL3, and OQL 160
A.1.3 Object Interchange Format - OIF 161
A.2 Web Standard and Middleware Adaptation for GFI2S 162
A.2.1 Object Database Connectivity - ODBC 163
A.2.2 Use of JAVA for Application Programming 164
A.2.3 Use of XML for Information Exchange 165

Samenvatting 180
Abstract 182
Résumé 184
