You will be contacted as soon as possible.
Contents

Acknowledgments  xii

1 Introduction  1
  1.1 Major Requirements in terms of Information Management  3
  1.2 Application Cases: an Overview  4
  1.3 Thesis Contribution  7
  1.4 Organization of the thesis  8

2 Information Integration Approaches, Mechanisms, and Tools  11
  2.1 Introduction  11
  2.2 A Taxonomy for Information Integration  12
    2.2.1 Distributed Systems  14
    2.2.2 Integrated Systems  17
  2.3 Further Classifications and Categorizations  28
  2.4 Discussion  29

3 WATERNET: Intelligent Supervision and Control in Heterogeneous and
  Distributed Application  31
  3.1 Introduction  32
  3.2 Water Environment and General application requirements  33
    3.2.1 Water Network Structure and Management  35
  3.3 Information Management Approach  38
    3.3.1 The Waternet Architecture  38
    3.3.2 Simple Scenario for Subsystems interaction  39
  3.4 Distributed Information Management System (DIMS)  40
    3.4.1 The PEER Federated Layer  41
    3.4.2 Schemas Management in WATERNET Using PEER  42
  3.5 Extended Integration Approach  45
    3.5.1 Data Adapters Supporting Openness  47
    3.5.2 The WATERNET System Implementation  48
  3.6 Conclusion and Discussion  48
    3.6.1 Major Characteristics and Benefits of Federated Approach in Waternet  49
    3.6.2 Contribution to GFL2S  49
4 MegaStore: Advanced Web Databases for Music Industry

4.1 Introduction .......................................................... 51
4.1.1 E-Commerce Applications: Attempts and Aims ............... 52
4.2 Problem Analysis and Required High Level Architecture ......... 52
4.2.1 Database Design .................................................. 53
4.2.2 ODL Schema definition ......................................... 55
4.3 The MegaStore System Architecture ................................ 57
4.3.1 The Internet-Shop Interface .................................... 58
4.3.2 The Shop-in-a-Shop Interface ................................... 58
4.3.3 Server Architecture Extension .................................. 59
4.4 Music Audio and Video content ..................................... 60
4.4.1 Bandwidth and Encoding Algorithm ............................ 60
4.4.2 Data Volume Estimation ......................................... 61
4.5 Music Data Manipulation ............................................ 62
4.5.1 Objects Loading Strategies ..................................... 62
4.5.2 Extensions .......................................................... 65
4.5.3 Database Administration ......................................... 66
4.6 MegaStore Interfaces - Advanced Features ......................... 67
4.6.1 Dynamic Browsing ............................................... 69
4.6.2 Ordering System .................................................. 70
4.6.3 System Security .................................................. 71
4.6.4 Current Implementation Status .................................. 72
4.7 Derived Applications ................................................ 73
4.7.1 LuisterPaal Interface ............................................. 73
4.7.2 Music Sheet Application ......................................... 75
4.8 Conclusion and Discussion .......................................... 78
4.8.1 Major Characteristics and Benefits provided to MegaStore Application 79
4.8.2 Contribution of the MegaStore’s Information Management Approach to GFI2S .................. 80

5 Information Management for Scientific Applications ................. 81
5.1 Introduction .......................................................... 81
5.2 Virtual Laboratory Architecture Design ........................... 82
5.2.1 The VL Information Management for COoperation - VINCO Module 85
5.3 Multi-Media Scientific Data Sets Manipulation ..................... 85
5.3.1 Storage of Large Scientific and Engineering Data Sets ....... 87
5.3.2 Scientific Data Archiving and Cataloguing Using Dublin Core Standard 93
5.4 Universal Database Access - Based on Standards .................. 99
5.4.1 Database Connection Module .................................... 102
5.4.2 Query Execution Module ........................................ 102
5.4.3 Results Presentation Module .................................... 102
5.4.4 Object Creation Module ......................................... 103
5.4.5 Further Benefits ................................................. 103
5.5 Data Access Security and Information Visibility (Safe/Reliable Data Export) 105
5.5.1 Role-based Access Control Definition .......................... 106
5.5.2 Flexible Role-based Access Interface ........................... 108
5.6 Physical Database Performance Analysis ........................... 109
5.6.1 Specific Functions to Access Binary Large Objects (Blobs) ......... 110
5.6.2 Benchmarking Tests For Matisse Database System ............... 110
5.6.3 Observations ............................................. 112
5.6.4 Lessons Learned ........................................ 112
5.7 Conclusion and Discussion .................................. 112
5.7.1 Contribution to GFI2S ................................... 113

6 GFI2S - Generic and Flexible Information Integration System 115
6.1 Introduction ................................................. 115
6.1.1 Focus of GFI2S .......................................... 117
6.2 GFI2S Information Integration Approach .......................... 119
6.2.1 Local Adaptation Layer (LAL) ................................ 122
6.2.2 Node Federation Layer (NFL) ................................ 125
6.2.3 Application of Database Standards and Middleware Solutions in GFI2S .................................................. 144
6.2.4 GFI2S in Action ............................................ 145
6.3 Conclusion .................................................... 147

7 Conclusions and Future Work .................................... 149
7.1 Overview ....................................................... 149
7.2 GFI2S Compared to Other Approaches .............................. 152
7.3 Lessons Learned ............................................. 153
7.4 Future Work .................................................. 154

A Application of Database and Middleware Standards in FGI2S 157
A.1 Object-Oriented Standards and Extensions Adaptation for GFI2S ..... 157
A.1.1 Object Definition Language - ODL ................................ 158
A.1.2 Query Languages - SQL, SQL3, and OQL .......................... 160
A.1.3 Object Interchange Format - OIF ................................ 161
A.2 Web Standard and Middleware Adaptation for GFI2S .................. 162
A.2.1 Object Database Connectivity - ODBC ............................ 163
A.2.2 Use of JAVA for Application Programming ...................... 164
A.2.3 Use of XML for Information Exchange .......................... 165

Samenvatting ....................................................... 180
Abstract .......................................................... 182
Résumé ............................................................. 184
