You will be contacted as soon as possible.

Contents

Preface	vii
1 Quality improvement from the viewpoint of statistical method	1
1.1 Quality improvement	1
1.2 Statistical method	3
1.3 Scientific method	4
1.3.1 Function of empirical inquiry	4
1.3.2 Method of empirical inquiry	6
1.4 The role of statistical method in scientific inference	6
1.4.1 Statistical thinking	8
1.5 Objective of the thesis	8
1.6 Outline of the thesis	9
1.6.1 Helicopter example	10
1.7 And how about Shewhart?	11
Appendix: Statistical control and assignable causes	13
2 Statistical improvement strategies	19
2.1 The structure of explanatory networks	19
2.1.1 Application to quality improvement	20
2.1.2 Elements for the methodological framework	23
2.2 Phases in empirical inquiry	23
2.2.1 Alternative forms of the scientific method in literature	26
2.2.2 Phases in statistical improvement strategies	28
2.2.3 Operationalisation	29
2.2.4 Exploration	30
2.2.5 Elaboration	33
2.2.6 Confirmation	34
2.2.7 Conclusion	36
2.2.8 Elements for the methodological framework	36
2.3 The iterative nature of empirical inquiry	37
2.3.1 Elements for the methodological framework	38
2.4 Types of influence factors	38
2.4.1 Elements for the methodological framework	40
2.5 Improvement patterns	41
2.5.1 Elements for the methodological framework	42
2.6 Statistical methods which support the proposed framework	43

2.7	The methodological framework	44
	Appendix: Statistical thinking	46
3	Corroboration of the proposed framework	49
3.1	Application to current improvement strategies	50
3.1.1	The improvement strategies	50
3.1.2	The collation	52
3.1.3	Discussion	57
3.2	Two case studies	57
3.2.1	Control of the moisture content of coffee	57
3.2.2	Reduction of scrap in biscuit production	61
3.3	Further experiences in consultancy work	66
3.3.1	Canonical structures of the explanatory network	66
3.3.2	Emphasis in projects	67
3.3.3	Importance of the Operationalisation phase	68
3.3.4	Tendency of engineers to be too critical in the Exploration phase	69
3.3.5	Operational definitions in quality improvement	69
4	The multi-vari chart: a systematic approach	71
4.1	Introducing the multi-vari chart	71
4.1.1	Example: weighing tea boxes	72
4.1.2	Multi-vari chart: basics and models	73
4.2	Test procedures	74
4.2.1	Tests under the random model	75
4.2.2	Tests under the mixed model	79
4.3	Using a multi-vari chart in practice	81
4.3.1	Example: homogeneity of caffeine distribution	81
4.3.2	Discussion	83
5	Robust individuals control chart for exploratory analysis	85
5.1	Introduction	85
5.2	The exploratory versus the monitoring phase	86
5.2.1	Differences	86
5.2.2	Two motivating examples	87
5.3	Proposed control chart	89
5.3.1	Requirements	89
5.3.2	Proposed procedure	90
5.3.3	Relationship with propositions in literature	90
5.4	Estimation and testing procedures	92
5.4.1	Estimation of the location of a shift	92
5.4.2	Testing significance of a shift	94
5.4.3	Multiple shifts	95
5.4.4	Detection of outliers	95
5.5	Two examples	96
5.6	Discussion	99
	Appendix: Approximating the distribution of RT^2	102
