The studies included in this thesis were initiated by KIT Institute and the Department of Global Health at the Academic Medical Center of the University of Amsterdam.

KIT Institute, The Global Fund to fight AIDS, TB and Malaria, and The Bill and Melinda Gates Foundation provided funding.

The printing of this thesis was financially supported by the Academic Medical Center of the University of Amsterdam.

Geographical prioritization of tuberculosis case-finding activities

ACADEMISCH PROEFSCHRIFT

ter verkrijging van de graad van doctor
aan de Universiteit van Amsterdam
op gezag van de Rector Magnificus
ten overstaan van een door het College voor Promoties ingestelde commissie,
in het openbaar te verdedigen in de Agnietenkapel
op vrijdag 2 oktober 2026, te 16.00 uur

door Christina Jane Mergenthaler
geboren te Charlotte

Promotiecommissie

Promotor:	prof. dr. F.G.J. Cobelens	AMC-UvA
Copromotores:	dr. E.J.J. Rood	KIT
	dr. D. Brals	AIGHD
Overige leden:	dr. K.E. Broen Herdzik	AMC-UvA
	prof. dr. M.M.G. Leeflang	AMC-UvA
	prof. dr. M. van Vugt	AMC-UvA
	prof. dr. M. Prins	AMC-UvA
	dr. C. Mulder	Vrije Universiteit Amsterdam
	prof. dr. S.J. de Vlas	Erasmus Universiteit Rotterdam

Faculteit der Geneeskunde

Contents

Chapter 1.	Introduction	7
Chapter 2.	The study of spatial autocorrelation for infectious disease epidemiology decision-making: a systematized literature review	33
Chapter 3.	Factors Affecting the Transition from Paper to Digital Data Collection for Mobile Tuberculosis Active Case Finding in Low Internet Access Settings in Pakistan	67
Chapter 4.	Evaluating tuberculosis service accessibility in Pakistan by analyzing population movement patterns from telecom mobility and survey data	93
Chapter 5.	Predicting communities with high tuberculosis case-finding efficiency to optimize resource allocation in Pakistan: comparing the performance of a negative binomial spatial lag model with a Bayesian machine-learning model	133
Chapter 6.	Hitting the hotspots: A retrospective evaluation of the MATCH framework to prioritize communes for community-based tuberculosis screening in Viet Nam	157
Chapter 7.	A retrospective analysis of a machine-learning Bayesian engine to predict tuberculosis positivity rates in active case-finding settings of Pakistan	197
Chapter 8.	Discussion	233
	English summary	264
	Nederlandse samenvatting	268
	Author contributions	273
	Portfolio	275
	Acknowledgements	280
