	Prof. dr. S.J.G. van Wijnbergen	Universiteit van Amsterdam
	Prof. dr. C.H. Hommes	Univeriteit van Amsterdam
	Dr. S.J. Huber	Universiteit van Amsterdam

Acknowledgments

I would like to thank each person who directly or indirectly contributed to the completion of this work. First, I am grateful to Professors Cees Diks, Cars Hommes and Marco van der Leij for accepting me to the doctoral programme. In particular, I would like to thank my supervisor and co-supervisor Cees Diks and Marco van der Leij for their enormous willingness to answer me and clarify my doubts. They were always available for our meetings and their constructive suggestions have contributed to improve this thesis. I could not have better supervisors.

I would like to thank the professors of the Doctorate Committee for accepting the invitation to take part in my doctoral defence. I am sure that their comments will contribute to the improvement of this thesis.

This work would not have been possible without the financial support of the Central Bank of Brazil. Its postgraduate education program allowed me to pursue my PhD. The support of the University of Amsterdam for the courses at the Tinbergen Institute is thankfully acknowledged.

I would not have finished this work without the support and love of my family. I am extremely grateful to my parents for their guidance and encouragement throughout my life. I wish to thank the support and understanding of my wife Luciana. My deepest affection goes to my son André and my daughter Isabel which were a source of great joy after the lonely days at the library of the Central Bank. I would also like to thank my brother Leonardo and my wife's family.

Finally, I want to dedicate this thesis to the memory of my beloved sister Silvia who would be delighted with the conclusion of this work.

Thank you all.

Brasília, March 2019.

Contents

Acknowledgments	i
1 Introduction	1
2 Dynamic interbank network analysis	5
2.1 Introduction	5
2.2 The model	9
2.3 Estimation	12
