# Contents

**Acknowledgments**  
1 Introduction 3  
1.1 A short history 3  
1.2 My own work 5  
2 Scenery reconstruction 8  
2.1 The scenery distinguishing problem 9  
2.2 The scenery reconstruction problem 9  
2.3 Reconstruction in polynomial time 10  
2.4 Errors in the observations 11  
2.5 Related coin tossing problems 11  
3 Random permutations 11  
3.1 Up-right paths 11  
3.2 Asymptotic behavior of the length of a longest increasing subsequence 12  
3.3 Moderate deviations 13  
References 13  

2 ERRW on finite graphs 19  
1 Introduction 19  
2 Result 20  
3 Reinforced random walk as a mixture of Markov chains 22  
4 The number of $k$-paths 25  
5 Asymptotics 29  
6 Proof of Theorem 2.1 33  
References 35  

3 How edge-reinforced random walk arises naturally 37  
1 Introduction 37  
1.1 Result 37  
2 Result for a general graph 40  
3 Mixtures of reversible Markov chains 41  
4 Some graph-theoretical lemmas 43  
5 Proofs of Theorems 1.2 and 2.1 45  
References 53
