Preface

Part I: The business cycle: measurement, stylised facts and theory

1. General introduction
   1 Introduction 3
   2 Empirical work and stylised facts 7
   3 Some other relationships 11
   4 Concluding comments 13

2. The business cycle: explanations and controversies
   1 Introduction 15
   2 Exogenous explanations of the business cycle 17
   3 Endogenous approaches to the business cycle 24
      3.1 Disproportionality and the business cycle 25
      3.2 Other real endogenous business cycles 29
      3.3 Monetary business cycle theories 30
   4 The political business cycle 35
   5 The business cycle and growth 38
   6 Conclusion and summary 42

Part II: The chaotic approach to the business cycle 45

3. The chaotic approach to the business cycle
   1 Introduction 47
   2 Chaotic dynamics of the logistic map 48
      2.1 An economic example: a production-tax model 48
      2.2 Mathematical intermezzo: the logistic map 53
         2.2.1 Period three implies chaos 53
         2.2.2 Finding chaos 56
      2.3 Empirical problems 58
      2.4 Controlling chaos 60
   3 Summary and conclusions 62

4. Chaotic dynamics in economic theory
   1 Introduction 63
   2 Chaos and the business cycle 64
      2.1 Chaos with perfect competition and perfect information 64
      2.2 Chaos with imperfect competition 70
      2.3 Financial chaos 73
         2.3.1 Financial markets 73
         2.3.2 Finance and production 74
