4.3. Experimental design and procedures..............................................................76
4.4. Results............................................................................................................80
   4.4.1. Choice of income.......................................................................................80
   4.4.2. Tax compliance.........................................................................................83
   4.4.3. Regression analysis...................................................................................88
4.5. A discussion of the results.............................................................................91
4.6. Conclusion.......................................................................................................94

Appendix 4.1. English version of the Albanian and Dutch instructions used in experiments..............................................96

Survey Methodology............................................................................................103
5.1. Introduction....................................................................................................103
5.2. The study design............................................................................................104
5.3. Measurement procedures..............................................................................105
   5.3.1. The selection of the research method.......................................................106
   5.3.2. A description of the method.................................................................109
   5.3.3. The pilot survey.......................................................................................110
   5.3.4. A description of the questionnaire........................................................111
5.4. Survey coverage............................................................................................112
   5.4.1. The sample size........................................................................................113
   5.4.2. Sampling design......................................................................................113
5.5. The validity and reliability of the measurement procedures..........................115
5.6. Sample characteristics..................................................................................115
5.7. Survey representativeness.............................................................................123
5.8. Conclusion......................................................................................................126

Appendix 5.1. The written questionnaire used in the field survey..........................127
6 Data Analysis and Results

6.1. Introduction

6.2. Sample characteristics with respect to taxes

   The reliability of information concerning tax evasion

6.3. Construction of the tax evasion variables

6.4. Attitudes towards tax evasion

6.5. The relationship between tax evasion and other data characteristics

   6.5.1. The extent of tax evasion and background information

   Regression Analysis

   6.5.2. Tax evasion and the respondents' attitudes

   Regression analysis

   6.5.3. The respondents' attitudes and their background information

6.6. A discussion of the results

6.7. Conclusion

7 Summary and Conclusions
