I would like to express my grateful thanks to the following people:

First of all, to my academic supervisors, Prof. Hanneke de Haes and Prof. Mirjam Sprangers, from the Department of Medical Psychology of the University of Amsterdam, who assumed the academic responsibility of supervising this thesis. I feel privileged and honoured in having had the unique opportunity to learn from two researchers who have contributed so much to quality of life research in oncology.

To Dr. Andrew Bottomley, Coordinator of the Quality of Life Unit of the European Organisation for Research and Treatment of Cancer (EORTC), I am very grateful for his constant support and close supervision of my research.

To all the co-authors involved in the studies presented in this thesis and whose challenging collaboration was very much appreciated. In particular, I would like to thank the following investigators: Dr. David Osoba, Prof. Carolyn Gotay, Corneel Coens MSc, Dr. Kristel Van Steen, Dr. George van Andel, Miss. Jane M. Blazeby, Dr. Henning Flechtner, Dr. Laura Biganzoli, Dr. Alfredo Zurlo and Dr. Martine Piccart.

To Dr. Luca Incrocci and his wife Nicole who kindly translated the summary of results section into Dutch.

To my colleagues, Sheila Sanderson-Scott and Karen West, of the EORTC Quality of Life Unit, whose editorial review and proof reading of this work was greatly appreciated.

To Sir Ronald Grierson, whom I have had the privilege to meet.

To the EORTC Lady Grierson Quality of Life Research Fellowship and the Camilla Samuel Fellowship in memory of Lady Grierson which have made this research project possible. I also would like to thank the EORTC, in particular Prof. Françoise Meunier, Director General of the EORTC and Dr. Patrick Therasse, Director of the EORTC Data Center who allowed me to pursue this research project.

To all my colleagues, past and present, of the EORTC Quality of Life Unit.

I am also deeply indebted to all the patients who gave their time to complete the HRQOL questionnaires.

Finally, to the late Prof. Robert Marrone, from California State University, with whom I would have loved to share my recent work.
