You will be contacted as soon as possible.

## Acknowledgements

The work presented in this thesis would never have been possible without the effort of many people from around the world collaborating in the ZEUS experiment. I would like to thank all my colleagues in ZEUS for making my time as a PhD student a truly memorable one. I would like to thank Ken Long for his guidance in the analysis. Thanks to Alex Tapper and Rod Walker for introducing me to the UK style of dealing with free time.

Many thanks to all my colleagues in the NIKHEF ZEUS group for providing a highly valued and pleasant atmosphere to work in. I would like to express my gratitude towards my promoter Jos Engelen. My co-promoter and coach Els de Wolf and to Paul Kooijman who introduced me to the world of high energy physics, thought me a lot about physics and always impresses me with his broad knowledge about "everything". Also I would like to thank Niels for all his advice and Sven for the many discussions we had.

All the thanks to my family and especially to Jennifer for being there and supporting me in my work. I do not know how I would have done it without you!
