Zimbabwean poem xvi
Abbreviations and acronyms xvii
Selected economic indicators for Zimbabwe xix

1. INTRODUCTION 1
   Structural adjustment 1
   The social implications of structural adjustment 4
   Methodological constraints in assessing the effects of adjustment 6
   Description of the study setting 9
   Hypothesis 11
   Conceptual framework 12
   Research design and methods 14
   Special note on the longitudinal dimension of the household study 16
   Limitations of the study 19

2. PROFILE OF ZIMBABWE 20
   History and physical and social geography 20
   Economic performance prior to structural adjustment 31
   Structural adjustment 34
   Drought 39
   The HIV/AIDS pandemic 40
   Poverty and the social dimensions of structural adjustment 42
   Conclusion 50

3. CHANGING PROFILE OF THE HEALTH SYSTEM, HEALTH INDICATORS AND
   HEALTH SYSTEM PERFORMANCE 51
   The legacy of the pre-independence health care system 52
   Health policy and organisation in the 1980s 53
   Health policy and legislative framework in the 1990s 58
   Financial and human resources for health care 59
   User fees 67
   The private for-profit sector 70
   The epidemiological transition: changing patterns of morbidity and mortality 72
   An international perspective on health system performance 86
   Conclusion 88
4. CHITUNGWIZA AND MUREHWA DISTRICT: DESCRIPTION OF STUDY SITES AND
STUDY POPULATIONS  91
Chitungwiza  92
Murehwa district  95
Household samples enrolled in the longitudinal study  100
Conclusion  102

5. USER FEES, QUALITY AND UTILISATION OF HEALTH SERVICES  103
Concepts and methods  104
Changes in user fees in Chitungwiza and Murehwa district  107
Health service utilisation in Chitungwiza  108
Health service utilisation in Murehwa district  113
Health workers’ professionalism and job satisfaction  122
Client satisfaction  125
Quality of services as an overarching issue  127
Conclusion  134

6. CHANGES IN HOUSEHOLDS’ SOCIAL AND ECONOMIC SITUATION --
THE SOCIAL DIMENSIONS OF STRUCTURAL ADJUSTMENT AND POVERTY  136
Cohort follow-up  137
Migration and household composition  139
Employment and income  142
Agricultural activity and food sufficiency  152
Food aid, social welfare and other types of assistance  153
Household expenditure, savings and debts  155
Discussion  160
Conclusion  164

7. CHANGES IN CHILD NUTRITIONAL STATUS  165
Under-nutrition in its context  165
Methods  170
Cross-sectional analysis, unpaired  174
Paired cross-sectional analysis  182
Cohort analysis  186
Choice of study design and the possible influence of loss to follow-up  192
Discussion  196
Conclusion  201

8. RISK FACTORS FOR CHILD MALNUTRITION  203
Concepts and methods  204
Risk factors in the urban area  209
Risk factors in the rural area  221
Conclusion  233
9. GENERAL DISCUSSION AND CONCLUSIONS
