Acknowledgements

An unwritten law says that the acknowledgements are the most read part of a thesis. I don't dare to make it as a statement but I believe is true. This thesis that (maybe) you read was possible also because I had the luck to be surrounded by nice special people who made my stay in Amsterdam easier and nicer.

I would like to start by thanking my promoter Prof. Peter Schoenmakers for giving me the chance to prove myself, accepting me as a PhD student in his group. I believe that I was lucky to have the chance to be guided by a very good scientist and especially a very nice man. Mixing, 'it would be nice if' with 'if I were you I would' to 'you have to!', you try to guide everyone by their capacity of understanding (and the famous diagonal of self-confidence). I believe this is one of 'the secrets' of your successful way to deal with people. You give many opportunities to young people to grow and learn how to look out for themselves. Dear Peter, I definitely learned a lot from you!!! Thank you Dana and Bonnie for a friendly welcome in your home!

Dear Wim, my co-promoter, thank you very much for your critical and straight to the point comments and solutions. You definitely know how to impose yourself (helping us with 'bureaucratic matters 'met Kok, Universiteit van Amsterdam!' ). You know how to be scientific and also very (sarcastically) funny when the situation requires. Sometimes during group meetings, you are 'away' and still asking difficult questions! Besides, you are too good in badminton. Now that I am ingeburgerd, I can say to all Dutch people 'I had a duet with Wim Kok' and he has a beautiful voice! Romanians don't have only funeral-music; listen to the cheeky-girls!

Prof. Hans Poppe, thank you for the continuous inspiration and for accepting to be part of my committee. It was an honor for me to meet you. When I had my first 'Friday drink' at Kraaks' corner, you knew about tuica, and you were also probably the only one who appreciated it. Together, we won the last-place in the badminton tournament and you let me take home the 'poedel-prijs' cup! It is a very nice souvenir.

Yvan Vander Heyden, thank you for accepting being part of my committee and for the nice work on calibration curves and the study on the PDI contribution to band broadening (in part chapter 1 of this thesis). Sjoerd van der Wal, thank you for being part of the committee evaluating this thesis and for your continuous interest in my work. I appreciated it very much and it was a motivation for me.

I got very good help both inside and outside of the lab, Rob O (jij had een hele goede les voor mij, de recorder uit gezet; "waarom doet dit systeem het niet?" PS: Ik heb de TV nog!!!!!), Aschwin (thank you for the 2D work!!! video camera...I liked the joke of the month) and Paul le Comte (thank you for the PL-Gel column experiments) and help with moving, thank you all very much. The atmosphere on the corridor wouldn’t have been the same without ‘Age’s group’! Age, not many people know that I initially applied in your group. Thank you for giving me the chance to come to the interview. When I saw you at first, I thought you were one of the Ph.D. students, when I heard your name I froze. My dear Marcel, you invested time in the layout of this thesis, you supported and pushed me to start writing it (you knew from experience and now I know it too®, you were right), but most of all you were the missing central-peace of the puzzle. Thank you for everything!!! Te iubesc foarte mult maaaare! Ia uite ce teză frumos!

Five years ago, when I came here I didn’t know one single person, and now, I have a looong list! If I forgot anyone in my acknowledgments, I apologize.
