Disclaimer/Complaints regulations

If you believe that digital publication of certain material infringes any of your rights or (privacy) interests, please let the Library know, stating your reasons. In case of a legitimate complaint, the Library will make the material inaccessible and/or remove it from the website. Please Ask the Library: <http://uba.uva.nl/en/contact>, or a letter to: Library of the University of Amsterdam, Secretariat, Singel 425, 1012 WP Amsterdam, The Netherlands. You will be contacted as soon as possible.

Contents

Chapter 1	Introduction	9
Chapter 2	Retention of CXCR4 in the endoplasmic reticulum blocks dissemination of a T cell hybridoma. <i>J. Clin. Invest.</i> 108:269-277 (2001)	49
Chapter 3	Stromal cell-derived factor-1-induced LFA-1 activation during in vivo migration of T cell hybridoma cells requires Gq/11, RhoA, and myosin, as well as Gi and Cdc42. <i>J. Immunol.</i> 166(7):4293-4301 (2001)	61
Chapter 4	Blocking G-protein $\beta\gamma$ dimers reduces desensitization of CXCR4, causing enhanced and persistent migration, independent of PI3-kinase. <i>Submitted for publication</i>	73
Chapter 5	Fusion of docked vesicles, driven by synaptotagmin, is required for chemokine-induced T-cell migration. <i>To be submitted</i>	85
Chapter 6	The chemokine receptor CXCR4 is required for outgrowth of colon carcinoma micrometastases. <i>Cancer Res.</i> 63:3833-3839 (2003)	97
Chapter 7	A putative role for the chemokine receptor CXCR5 in tumor growth of colon carcinoma cells. <i>Preliminary report</i>	107
