Acknowledgments
By completion of my PhD work at Anna's Hoeve – Swammerdam Institute for Life Sciences, University of Amsterdam, there is much more that I want to express when thinking of the past years.

First of all, I want to sincerely thank my supervisor Prof.dr. Marian Joels for having offered me this opportunity that enabled me to stay in the beautiful Netherlands. From posters to presentations; from experiments to scientific reporting, you were always ready to give me invaluable advice and practical help whenever I needed it. You have demonstrated to me the disciplined attitude, talented mind and perseverance in hard working that a scientific success may demand. Without your commitment in instructions and inspirations, making my career in neuroscience would be less pleasant. Thank you!

I deeply appreciate Prof.dr. E.R. De Kloet for his encouragements to my career. Thank you very much for the stimulating discussions about my work, which have expanded my scientific views. I want to express my great gratitude to Prof.dr. F.H. Lopes da Silva for his great kindness and the series of advice and support to my future. I thank Prof.dr. W. Wadman for his evaluations on my progress of PhD work.

I cordially thank Prof. A.B. Smit and Dr. S. Spijker for their supervision on the joint qPCR project. It has been nice working at your laboratory every now and then. I highly appreciate Dr. E. Vreugdenhil and Dr. N.A. Datson for supervising me on the microarray work at Leiden in the beginning of my PhD work.

My many thanks should go to Dr.Lucassen for his efforts in shaping my neuroscience background, especially neurogenesis and apoptosis. Thanks for always being able to make time for me when I needed.

If 30 years might be awarded to my scientific life, thus, more than four years has already been enjoyably committed to Anna's Hoeve. It is always nice to think of you: Els Velzing – a friend, your help both inside and outside the lab made my life in Amsterdam easier, thanks a lot for everything, the dinners, the trips and the gossips! Rob, I am very grateful to your help and, especially, the house painting (with Els). I promise that I will never cook your Chinchillas! Henk - an international authority, I need more single cells from you! Harm, it was great that we have been working together. Thanks for all the discussions about work. Pascal, - it was nice to have worked together, thanks for showing me how to make slices.

My dear AIO fellows, it is always great to think of the time we spent in the lab. Deborah - a fair brave leader, many thanks for your helps - the house searching & moving and much more…. Els van Riel, thanks a lot for your gorgeous baby gifts. My brain still holds the good taste of my first Dutch sausage at your home in 2000. Martin, thanks for your demo how to handle rats, though, I was bitten twice by the crazy rats. Vivi, it was great that we got a paper published together! Good luck with your work at Harvard! Karin, successes with your recording! Great you have a music composer at home. Neeltje (Nature), I know your name will be shown in Nature, thanks for so many tea-breaks together. Olof – the AIO Chairman, we can always talk about Stress, and of course the LTP. Pu, it is nice that you have updated me some modern Chinese slang. Suharti, you know that I can pronounce your name
correctly! Solange, great that we have worked in the same lab! Linda, an excellent violinist, your typing speed is amazing! Aly and Inge, thanks for your kind assistance with my work. Diny, thanks a lot for the latest textbooks!

Once my hands out of Pipette, it is always nice to talk with you: Wim R., Monique, Wim, G., Christa, Angela, Ingrid, Hans, Guangchun, Annelies, Taco, Natalie, … …

Outside University of Amsterdam, I would like to thank Prof. AS Pena from Free University Amsterdam for his gorgeous help with my accommodation. I am indebted to Bart Fisher from NIH for arranging my apartments.

I like to thank Dr. Pentti Aspila from ArgoFood Centre Finland for his encouragements to my PhD work at Amsterdam. Prof. Xiusheng Wang from China is appreciated for her sincerely support to my life aboard.

Without you - friends - my life at Amsterdam would only mean two cots: home and lab. Yundan Jia, and …, thanks for everything!

Mostly, Wendy and Lixin, your everlasting support has been of crucial importance. Thank you very much!
