You will be contacted as soon as possible.
List of Figures

1.1 The daily returns of the S&P 500 ........................................... 2
2.1 Sample paths of the AEX ....................................................... 14
2.2 Intra-day returns of the AEX .................................................... 15
2.3 Normalized daily return data of the AEX .................................... 18
2.4 Scatterplot of $(\Phi(u_d), \Phi(u_{d+1}))$ of the AEX ....................... 19
2.5 ACF and PACF of the standardized returns of the AEX ................. 23
2.6 ACF and PACF of the squared standardized returns of the AEX ....... 24
2.7 The daily volatility cycle of the AEX ........................................ 25
2.8 Half-hour volatility of the AEX ............................................... 27
2.9 Time-change of the AEX ....................................................... 28
2.10 Log volatility of the AEX ....................................................... 28
2.11 Standard deviations of relative price and volatility changes of the AEX ................................................................. 31
2.12 Realized and EGARCH volatilities of the AEX ............................. 34
3.1 Intra-day tick graphs of IBM and the S&P 500 ............................ 39
3.2 The S&P500 in physical and financial time .................................. 45
3.3 The time-change of the S&P 500 ................................................ 46
3.4 The returns of the S&P 500 in financial time ................................ 47
3.5 ACF and PACF of the (squared) returns in financial time for the S&P 500 ................................................................. 52
3.6 The density of the S&P 500 returns in financial time ..................... 53
3.7 Graphical evidence of normality for the S&P 500 .......................... 54
4.1 Breakpoints in the time-change of the S&P 500 ............................ 60
4.2 A piecewise linear function with two breakpoints ........................ 61
4.3 The approximation error for different number of breakpoints .......... 64
4.4 The location of the breakpoints for the S&P 500 .......................... 65
4.5 The daily increase of the quadratic variation for the S&P 500 .......... 68
4.6 The quadratic variation of the error function ............................ 69
List of Figures

4.7  Density of the location of a spurious breakpoint .......................... 70
4.8  An example of a piecewise linear function perturbed with a concatenation of three Brownian bridges .......................... 71
4.9  The location of the breakpoints for the S&P 500 after pruning ........ 72
4.10 The piecewise linear approximation to the time-change for the S&P 500 .............................................................. 73
4.11 The sample function of the error process during the 19th regime .......... 74
4.12 Locating the points $T_1$ and $T_2$ ......................................................... 76
4.13 Simulated likelihood function of the 20th breakpoint ..................... 76
4.14 The activity of the S&P 500 plotted on a logarithmic scale ............ 78
4.15 The activity in financial time plotted on a logarithmic scale ........... 88
4.16 The locating of the breakpoints for the AEX ................................. 89
4.17 The activity of the AEX plotted on a logarithmic scale .................. 90

5.1  $P(Z_{n+3} > z)$ ........................................................................ 104
