You will be contacted as soon as possible.
Sicco Anthony Bus was born on the 12th of December 1973 in Evansville, Indiana in the United States of America. After having spent several years of his juvenile life in Halsteren and in Wales (Milford Haven and Haverfordwest), he completed primary and secondary school (CSG Jacob van Liesveldt) in Hellevoetsluis. In 1998 he obtained a Masters degree in Human Movement Sciences at the Vrije Universiteit in Amsterdam, with a major in Exercise Physiology and minors in Health Science and Psychology of Human Movement. His final research project for this degree on the biomechanics of running in older-age male runners was performed at the TNO Center for Shoe and Leather in Waalwijk.

After graduation, Sicco joined the Center for Locomotion Studies (CELOS) at Penn State University in Pennsylvania as a visiting researcher and performed several studies on the diabetic foot and on the biomechanics of daily life activities in older-age women under the supervision of Prof. Peter Cavanagh. Sicco's enthusiasm for diabetic foot research was established here. After two years, in 2001, Sicco returned to Amsterdam to start as a PhD candidate under the supervision of Prof. Marcel Levi, Dr. Bob Michels and Dr. Mario Maas in the Department of Internal Medicine at the Academic Medical Center (AMC) of the University of Amsterdam. At the AMC he continued his research started at Penn State on the structural and functional aspects of the diabetic neuropathic foot, which resulted in this doctoral thesis.

Since November 2003 Sicco works as a senior researcher in the Diabetic Foot Unit of the Department of Surgery at the Twenteborg Hospital in Almelo, where he coordinates several studies on offloading foot ulcers in diabetic patients with peripheral neuropathy.

Sicco lives with his girlfriend Iva Bicanic and their one-year-old son David in Amersfoort.
