If you believe that digital publication of certain material infringes any of your rights or (privacy) interests, please let the Library know, stating your reasons. In case of a legitimate complaint, the Library will make the material inaccessible and/or remove it from the website. Please Ask the Library: http://uba.uva.nl/en/contact, or a letter to: Library of the University of Amsterdam, Secretariat, Singel 425, 1012 WP Amsterdam, The Netherlands. You will be contacted as soon as possible.
Publications

De novo mutation in the SCN5A gene associated with early onset of sudden infant death.
*Circulation.* 2001 sep 4; 104 (10): 1158-64

Genotype-phenotype relationship in brugada syndrome: electrocardiographic features differentiate SCN5A-related patients from non-SCN5A-related patients.
*Journal of the American College of Cardiology.* 2002 July 17; 40 (2): 350-6

A cardiac sodium channel mutation cosegregates with a rare connxin40 genotype in familial atrial standstill
*Circulation Research.* 2003 Jan 10; 92(1): 14-22

JPP Smits, AAM Wilde
Brugada Syndrome: in search of a genotype-phenotype relationship
*Herzschr Electrophysiology* 2002; 13: 142-148

HL Tan, CR Bezzina, JPP Smits, AO Verkerk, AAM Wilde
Genetic control of sodium channel function
*Cardiovascular Research* 2003; 57: 961-73(Review)

Conduction slowing by the gap junctional uncoupler carbenoxolone.
*Cardiovascular Research* 2003 Nov 1;60(2):288-97.
J.P.P. Smits, A.A.M. Wilde.
Genotype-Phenotype relationship in Brugada syndrome
to be published as bookchapter in:
Brugada Syndrome
C. Antzelevitch and P. Brugada, editors

J.P.P. Smits, M.W. Veldkamp, A.A.M. Wilde
Mechanisms of inherited cardiac conduction disease
Submitted to EUROPACE

Substitution of a conserved alanine in the domain IIIS4-S5 linker of the human cardiac sodium channel causes long QT syndrome
Submitted to Cardiovascular Research

J.P.P. Smits, P.C. Viswanathan, Z.A Bhuiyan, A.A.M. Wilde, J.R. Balser
Conformational changes in the C-terminus of the cardiac sodium channel influences channel inactivation
Submitted to FEBS letters

A mutation in the human cardiac sodium channel associates with sick sinus syndrome, conduction disease and Brugada syndrome
To be submitted
