Epilogue

I wish to express my sincere gratitude to all who have contributed in any way to the completion of this thesis. The presented research was carried out at the research laboratories of 3M Dental Products Division and at the Academisch Centrum Tandheelkunde Amsterdam (ACTA). The cooperation and support of many individuals helped to make this possible. Included among these are: Prof. Dr. C.L. Davidson, who as my promoter provided guidance, constructive criticism, sound scientific support and encouragement. I want to thank him especially for believing in me and giving me the opportunity to undertake this degree. His enthusiastic support throughout both the process of acceptance into the program, and the completion of my thesis has been of great importance. He is both a friend and a respected mentor to me.

Dr. R.L. Erickson, my co-promotor, who also offered unending support and guidance in the development of this research, and in the critical review of the articles. A special thanks to him for giving me a fond enthusiasm for research, and for his patience with my never-ending questions.

Prof. Dr. J.R. Bausch, Prof. Dr. J.M. ten Cate, Prof. Dr. A.J. Feilzer, Prof. Dr. P. Lambrechts and Prof. Dr. A. van Nieuw Amerongen of the promotion committee for their willingness to participate on my thesis committee, and for their critical review of the manuscript.

Prof. Dr. J.M. ten Cate and his colleagues at ACTA, Dept of Cariology, for allowing me to use their microradiography equipment, and for sharing their expertise with me.

Dr. Anton J. de Gee for participating in the critical review of a number of manuscripts and for his friendship.

Dr. J.M. Horn for allowing me access to specialized equipment and the research labs at 3M Dental Products Division.

Ms. C.J. Brozek and Dr. B.C. Copley of 3M Skin Health Division, for their ongoing encouragement and support.

Mr. R.H.Halvorson, for his friendship and moral support during the completion of this research and thesis.

My whole family, especially my husband Dave, and daughter Leah, for their patience, support and love. My sincere thanks to them for the sacrifices they have made for me during this busy time.
