List of Tables

1.1 Labour force participation by country, percentages 22
1.2 Percentages of working age non-workers who are not seeking jobs 23
1.3 Percentages of long-term unemployed individuals amongst the unemployed 24
1.4 Year-on-year transition intensities of individuals in national labour force surveys (in percent) 25
1.5 Upper-bounded job-to-job transition rates in selected European countries 27

2.1 Percentages of individuals in new jobs amongst employed respondents in national labour force surveys 39
2.2 Percentages of new jobs amongst employed respondents in national labour force surveys, by occupation (ISCO-88, 1 digit) 39
2.3 Percentages of individuals in new jobs, by personal characteristics 40
2.4 Percentages of individuals in new jobs, by occupational characteristics (ISCO-88 one digit) 41
2.5 Percentages of individuals in new jobs, by enterprise size 42
2.6 Percentages of individuals receiving incomplete payments in primary jobs, new jobs compared to full sample 42
2.7 Mixed proportional hazard model with controls for unobserved heterogeneity, January 1991 stock 52
2.8 Mixed proportional hazard model of transitions from jobs, with controls for unobserved heterogeneity, jobs beginning in period 1991-1998 56
2.9 Employment rates at the ISITO interview date, disaggregated by age, sex and education 64
