## Contents

1 Introduction and Outline  
1.1 Introduction and Motivation ........................................ 1  
1.2 Financial Integration .................................................. 2  
  1.2.1 Short-Term Capital Flows to Emerging Markets ................. 4  
  1.2.2 The Timing of Speculation and Capital Flight .................. 7  
1.3 Trade, Technology, and the Labor Market .......................... 11  
  1.3.1 Trade and the Labor Market ..................................... 11  
  1.3.2 Technology and the Labor Market ............................... 14  
1.4 Concluding Remarks .................................................... 15  

2 Patterns of Globalization ................................................... 17  
2.1 Introduction ................................................................. 17  
2.2 Financial Integration ..................................................... 17  
  2.2.1 Definitions and Data Sources ..................................... 17  
  2.2.2 Trends and Regional Patterns .................................... 22  
  2.2.3 Sectoral Allocation of Total Debt ............................... 27  
  2.2.4 Volatility of Capital Flows and Vulnerability to Financial Crises 29  
  2.2.5 Concluding Remarks ................................................. 32  
2.3 Trade, Technology, and the Labor Market ............................ 33  
  2.3.1 Background ............................................................ 33  
  2.3.2 Trade versus Technology .......................................... 36  
  2.3.3 Concluding Remarks ................................................ 40  

3 Short-Term Debt of Emerging Markets ................................... 43  
3.1 Introduction ........................................................................ 43  
3.2 Factors that Affect the Maturity Structure of External Bank Debt 46  
3.3 The Empirical Evidence .................................................... 51  
  3.3.1 The Explanatory variables .......................................... 51
CONTENTS

3.3.2 Regression Results ........................................... 56
3.3.3 Additional Factors Affecting the Maturity of External Bank Debt .... 59
3.4 The Cyclical Nature of Short-Term Capital Flows ...................... 60
  3.4.1 Short-Term Debt: stabilizing or destabilizing? .................. 60
  3.4.2 Short-Term Capital Flows and Shocks ........................ 65
  3.4.3 Risk Perception and Pro-Cyclicality .......................... 67
3.5 Conclusion ......................................................... 70

4 Coordination of Speculation ........................................ 75
  4.1 Introduction ..................................................... 75
  4.2 The Discrete Time KFG Model ................................... 77
  4.3 Coordination in the KFG Model .................................. 80
  4.4 The General Case and Contagion ................................ 86
  4.5 Concluding Remarks .............................................. 88
  4.6 Appendix ......................................................... 91

5 The Silence of the Lambs ............................................ 95
  5.1 Introduction ..................................................... 95
  5.2 Location and Capital Flight ..................................... 99
    5.2.1 The Ingredients of the Model ............................... 99
    5.2.2 Solving the Model .......................................... 103
    5.2.3 Conclusions when Local and Resident Investors Need Each Other . 106
  5.3 Local Versus Foreign Players ................................... 108
  5.4 The Role of Information Quality ................................ 110
  5.5 Adding a Post-Crisis Tax on Resident Investors ................... 112
  5.6 Government Guarantees ......................................... 114
  5.7 Conclusion ...................................................... 115

6 Trade Liberalization and Labor Market Dynamics ...................... 119
  6.1 Introduction ..................................................... 119
  6.2 The Model in Steady State ..................................... 124
  6.3 Trade Liberalization and Employment ............................ 132
    6.3.1 The Effects of Trade Liberalization in Sector \( x \) ........... 133
    6.3.2 The Effects of Trade Liberalization in Sector \( z \) .......... 136
  6.4 Some Illustrative Simulations .................................. 138
  6.5 Expanding the Liberalization Package .......................... 142
  6.6 Concluding Remarks ............................................ 145
## CONTENTS

### 6.7 Appendix
- 6.7.1 Derivative of $q_t^f$ and $q_{t+1}^f$ with respect to $p_t^f$  ........................................ 146
- 6.7.2 Derivative of $q_t^f$ and $q_{t+1}^f$ with respect to $p_t^f$  ........................................ 148

### 7 From Solow Residual to Solow Paradox
- 7.1 Introduction .................................................. 153
- 7.2 Employment, Wages, and Profits .............................. 157
- 7.3 Investment by Workers ....................................... 159
- 7.4 Productive New Technologies ................................. 161
- 7.5 Unproductive New Technologies .............................. 162
- 7.6 The Consequences for Employment ......................... 165
- 7.7 Conclusion ..................................................... 169

References ......................................................... 170

**Samenvatting (Summary in Dutch)** ........................................ 182
