# Contents

## 1 Introduction
- 1.1 The VE Paradigm ........................................... 1
  - 1.1.1 VE Characterization .................................. 4
  - 1.1.2 VE Life Cycle .......................................... 5
  - 1.1.3 VE Member Roles ...................................... 9
- 1.2 Thesis Objectives and Proposed Approach ..................... 10
  - 1.2.1 Thesis Objectives ..................................... 11
  - 1.2.2 Summary of General Solution Approach ................ 13
- 1.3 Related Projects and Scientific Publications ................. 14
  - 1.3.1 PRODNET II Project Overview .......................... 14
  - 1.3.2 Other Related Projects ................................. 17
  - 1.3.3 Summary of Related Scientific Publications ........... 19
- 1.4 Structure of Thesis Document ................................ 20

## 2 Distributed Information Management Approaches for Virtual Enterprises
- 2.1 Introduction .................................................. 23
- 2.2 VE Related Information Technology .......................... 26
  - 2.2.1 Approaches for Distributed Information Management .... 27
  - 2.2.2 Related Information Models and Standards .............. 31
  - 2.2.3 Other related technologies and tools ................... 35
- 2.3 A Framework for Information Management Evaluation of VE Infrastructures ........................................... 39
  - 2.3.1 Specific VE Information Management Platforms .......... 40
  - 2.3.2 Characterization and Evaluation of VE infrastructures ... 48
- 2.4 Conclusions and Future Directions ........................... 53

## 3 Analysis of VE Information Management Requirements and the Proposed Federated Approach
- 3.1 Introduction .................................................. 57
- 3.2 Industrial Manufacturing VE Scenarios ......................... 58
  - 3.2.1 Scenario Case 1 – Interactions between VE Members ...... 60
  - 3.2.2 Scenario Case 2 – VE Order Related Functionalities ...... 60
5 Extension and Application of the DIMS Federated Architecture to Support Service-oriented VEs

5.1 Introduction ........................................... 149
5.2 A Reference Infrastructure for Tourism VEs ............................ 150
  5.2.1 The VE Paradigm in Tourism ................................ 150
  5.2.2 A Support Infrastructure for Tourism VEs ......................... 152
5.3 Federated Information Management Requirements for Tourism VEs ... 158
  5.3.1 Functional Information Management Requirements .................. 159
  5.3.2 Requirement Analysis for Information Modeling ...................... 164
5.4 Extension and Application of DIMS to Support Tourism VEs .......... 167
  5.4.1 Extending the DIMS Architecture .................................. 167
  5.4.2 Design of Service Interface Definitions Catalogue ................. 173
  5.4.3 Application of Internet Technology for Extended DIMS Implementa-
  tion ...................................................................... 178
5.5 Conclusions and Future Work ............................................. 182

6 Conclusions and Future Work ............................................. 185

6.1 Summary of General Approach ........................................... 185
6.2 Summary of Achievements ................................................. 186
6.3 Extensions and Future Work ............................................... 189
  6.3.1 Management of Multiple VE Integrated Schemas ..................... 189
  6.3.2 XML for VE Federated Information Management in VEs ............ 190
  6.3.3 Generic Federated Information Management for IDF................. 190
  6.3.4 Other Future Directions .............................................. 191

A Author’s Publications ...................................................... 193

B Comparison of VE Information Management Infrastructures ..... 197

C Description of DIMS Implemented Services ............................ 203
  C.1 Support Services for LCM ............................................ 203
  C.2 Support Services for DBPMS .......................................... 203
  C.3 Support Services for PPC Module ..................................... 205
  C.4 Support Services for EDI Component .................................. 206
  C.5 Support Services for STEP Component ............................... 207
  C.6 Support Services for PCI ............................................. 208
  C.7 Support Services for VE Configuration ................................ 208

Bibliography ...................................................................... 209

Samenvatting .................................................................... 225

Acknowledgments ................................................................ 227
