List of tables

Table 4.3.1 Legal types of land 81
Table 4.2.1 Mean year precipitation per period 93
Table 3.1 Number of persons interviewed for survey 60
Table 4.2.2 Divers climatic parameters in the three climatic zones 94
Table 4.2.3 Some health indicators for the Far North province compared with rural and total Cameroon 100
Table 4.2.4 Education-related indicators for the Far North and country in 2001 102
Table 4.2.5 Livestock numbers in the Far North over the years (long term) 105
Table 4.2.6 Livestock numbers over the years (shorter term) in Far North Province 106
Table 5.2.1 Population densities over the years 124
Table 5.2.2 Mean number of children and wives per household, over the generations 125
Table 5.2.3 Mean surface of arable land (in ha) per household in three origin villages 126
Table 5.2.4 Surface of land per person 126
Table 5.2.5 Percentages of respondents hiring (plus prices) or borrowing fields 127
Table 5.2.6a Production and used surface of respondents of Sirlawé in 1999 and 2000 128
Table 5.2.6b Production and used surface of respondents of Tchatibali in 1999 and 2000 128
Table 5.2.6c Production and used surface of respondents of Kolara in 1999 and 2000 128
Table 5.2.7 Cereals needs and production per mean household in the three villages 129
Table 5.2.8 Comparison of calorific needs and calorific production from agriculture per (mean) household per year 130
Table 5.2.9 Percentage of households without enough cereals or calories from agriculture 131
Table 5.2.10 Number of respondents that did not cultivate enough cotton to make up for the investment and the range of money they lacked 133
Table 5.2.11 Benefit calculation with alternative of rain-fed sorghum production instead of groundnuts 134
Table 5.2.12: Number of some farm animals per household in current and former generation 135
Table 5.2.13 Number or density of cattle over the years and per region. 135
Table 5.2.14 Number of households of respondents that lost animals because of disease 137
Table 5.3.1 Fertility ameliorating measures 146
Table 5.3.2 Number of respondents with erosion or water problems and their countermeasures 147
Table 5.3.3 Percentage of households using ploughs and draught animals 150
Table 5.3.4 Percentage of population wanting to leave for certain reasons per surface-category of land possession 151
Table 5.3.5 School attendance of respondents and their children (of school age) 153
| Table 5.3.6 | Number of respondents (household heads) producing cotton or ground nuts | 154 |
| Table 5.3.7 | Production in Fcfa / ha of three crops in the three origin villages | 154 |
| Table 5.3.8 | Number of respondents with small or large ruminants, and mean per keeping household | 155 |
| Table 5.3.9 | Number of respondents keeping chickens and/or ducks, and mean birds per keeping household | 156 |
| Table 5.3.10 | Number of respondents keeping pigs and/or guinea fowls, and mean animals per keeping household | 157 |
| Table 5.3.11 | Summary of current level insecurities and investments in the domains of the ‘insecurity complex’, based on ‘capitals of the origin villages as a whole | 165 |
| Table 5.4.1 | Percentage of persons in three Kolara neighbourhoods born in a certain place of origin | 168 |
| Table 5.4.2 | Comparison of year precipitation between heartland and Kolara – Kobo (in mm/year) | 174 |
| Table 5.4.3 | Percentages of persons with certain reasons to move away | 175 |
| Table 5.4.4 | (Potential) migrants access to arable land, fertility status of these lands in the places of origin and reasons to leave | 176 |
| Table 5.4.5 | Livestock ownership of migrants and use of animal manure in origin region | 177 |
| Table 5.4.6 | Numbers of settlers with a certain arable surface in the origin region versus TLU ownership | 178 |
| Table 5.4.7 | Disposition of arable surface (in ha) in origin villages of different categories | 179 |
| Table 5.4.8 | Livestock and plough ownership and use by different groups of respondents | 181 |
| Table 5.6.1 | Percentage of respondents (n = 58) that thinks the change of cattle numbers in the bush is due to certain categories of owners | 188 |
| Table 5.6.2 | Percentage of respondents with a certain idea about the reason of bush surface decline | 188 |
| Table 5.6.3 | Ruminant numbers per respondent | 191 |
| Table 5.6.4 | Percentage of respondents that sold or bought cattle in 2000 and 2001 and the number thereof per person that bought or sold | 192 |
| Table 5.6.5 | Cattle loss in 2000 and 2001: reasons and numbers | 193 |
| Table 5.6.6 | Percentage of respondents that indicate a certain type of authority that has the power to decide about bush-use or water-use | 195 |
| Table 6.2.1 | Precipitation in Sir and Mogodé and differences over the years 1995 – 2000 | 212 |
| Table 6.2.2 | Development of population densities in the study region | 214 |
| Table 6.2.4 | Surface of arable land per class of obtaining | 216 |
| Table 6.2.5 | Production and surface used by respondents’ households | 221 |
| Table 6.2.6 | Production per surface area (kg/ha) of four main crops in Dzambou | 221 |
| Table 6.2.7 | Production of potatoes and sweet potatoes | 222 |
Table 6.2.8 Needs and production of cereals per average household 223
Table 6.2.9 Comparison of calorific needs (according to FAO-norms) and calorific production per (mean) household 223
Table 6.2.10 Percentage of households without enough cereals or calories from agricultural production. 224
Table 6.2.11 Percentage of respondents with animal losses over the last five years 228
Table 6.3.1 Fertility improving measures 235
Table 6.3.2 Other field improving measures 236
Table 6.3.3 Land prices (in Fcfa x 10^3 /ha) over the years 237
Table 6.3.4 Cattle related activities of household heads 241
Table 6.3.5 Percentages of people who owned or borrowed and loaned out ploughs and draught animals 244
Table 6.3.6 Summary of current level of insecurities and investments in the domains of the ‘insecurity complex’ 249
Table 6.4.1 Number of users and non-users of pasture fields and the position of owned fields (shared or private) 251
Table 6.4.2 Number of users, non-users and owners of pasture fields with a certain soil fertility of fields outside the pasture 251
Table 6.5.1 Division of opinions about the pasture 256
Table 6.5.2 Number of village inhabitants with a certain field position and their opinions about the pasture reserve 257
Table 6.5.3 Perception of soil fertility of used fields versus opinion on pasture 258
Table 6.6.1 Number of people with a certain number of cattle and their opinions about the pasture reserve 260
Table 6.6.2 Cattle relations versus opinion about pasture 260
Table 6.6.3 Wealth position of groups of inhabitants with a certain opinion (activity) vis-à-vis the creation of the pasture reserve 262
Table 6.6.4 Numbers of Muslims, animists and Christians living within or outside the “Fulbe settlement” and their opinions about the pasture reserve 264
Table 6.6.5 Opinion of Inhabitants of Fulbe settlement related to the position of their fields 267
Table 7.2.1 Average annual rainfall per period 278
Table 7.2.4 Surface and number of inhabitants over the years of Oudda and its neighbourhoods 281
Table 7.2.5 Comparison of population densities in Oudda neighbourhoods 282
Table 7.2.6 Mean per person surface area of arable land (in 2000) 283
Table 7.2.7 Range of available land surface area (for male household heads; n = 82) in quarts 284
Table 7.2.8 Land availability versus land quality (n = 82, but 38 people have more than one type of land) 285
Table 7.2.9 Production and surface area used by respondents in 1999 and 2000 286
Table 7.2.10 Production per ha (kg and kcal) based on Agricultural Service data and interview data. 287
Table 7.2.11 Cereals needs and production per mean household in Oudda per year 287
Table 7.2.12 Comparison of calorific needs and calorific production per (mean) household per year 288
Table 7.2.13 Percentage of households without enough cereals or calories 288
Table 7.2.14 Numbers of cattle over the years for the department and 2 sub-departments 291
Table 7.2.15 Number and density of cattle in 2000 292
Table 7.2.16 Division of cattle over the households 293
Table 7.2.17 Numbers of small ruminants 293
Table 7.3.1 Fertility improving methods 301
Table 7.3.2 Animal ownership and the use of the dung of those animals 302
Table 7.3.3 Ownership of TLU and the use of animal dung 303
Table 7.3.4 Number of respondents who bought, rented or borrowed fields or want to do so 304
Table 7.3.5 School attendance 306
Table 7.3.6 Source of plough and draught animals used 311
Table 7.3.7 Summary of current level, insecurities and investments in the domains of the ‘insecurity complex’, based on ‘capitals’ of the village in total 316
Table 7.4.1 Number of respondents that owns and/or uses fields at certain places 318
Table 7.4.2 Reasons for use or non-use of owned fields in Jiksa (n= 34) 318
Table 7.4.3 Number of owners/users and owners/non-users of Jiksa fields sending school-age children to school 319
Table 7.4.4 Division of wealth (n = 81) with category percentages in brackets 320
Table 7.6.1 Comparison of population density in 2000, in different areas 326
Table 7.6.2 Number and density of livestock of Fulbe in 2000 329
