It is not permitted to download or to forward/distribute the text or part of it without the consent of the author(s) and/or copyright holder(s), other than for strictly personal, individual use, unless the work is under an open content license (like Creative Commons).

#### **Disclaimer/Complaints regulations**

If you believe that digital publication of certain material infringes any of your rights or (privacy) interests, please let the Library know, stating your reasons. In case of a legitimate complaint, the Library will make the material inaccessible and/or remove it from the website. Please Ask the Library: <https://uba.uva.nl/en/contact>, or a letter to: Library of the University of Amsterdam, Secretariat, Singel 425, 1012 WP Amsterdam, The Netherlands. You will be contacted as soon as possible.

## CONTENTS

Chapter 1	General Introduction	9
Chapter 2	Differential spatiotemporal expression of doublecortin-like (DCL) and doublecortin (DCX) in the early embryonic murine neocortex. <i>Submitted</i>	35
Chapter 3	A critical role for tau-4R in postnatal neuronal maturation and neurogenesis regulation in the hippocampal DG. <i>Submitted</i>	53
Chapter 4	Improved long-term potentiation and memory in young Tau-P301L transgenic mice prior to onset of hyperphosphorylation and tauopathy. <i>Journal of Neuroscience 26 (13): 3514-3523 (2006)</i>	87
Chapter 5	Increased proliferation reflects glial and vascular-associated changes, but not neurogenesis in the presenile Alzheimer hippocampus. <i>Neurobiology of Disease: In Press (2006)</i>	109
Chapter 6	Summary and General discussion	133
Addendum	Doublecortin-Like, a microtubule associated protein expressed in radial Glia is crucial for neuronal precursor division and radial process stability. <i>Submitted</i>	155
