How Europeans see Europe: structure and dynamics of European legitimacy beliefs

Scheuer, A.

Citation for published version (APA):
List of Figures and Tables

1 Figures

Chapter 2
Figure 2-1: Elements of the European belief system ........................................... 19
Figure 2-2: Schematic view on latent structure analysis ........................................... 20

Chapter 3
Figure 3-1: Sequence of analyses reported in Chapter 3 ........................................... 36
Figure 3-2: Sequence of analyses reported in Section 3.1 ........................................... 37
Figure 3-3: Sequence of analyses reported in Section 3.2 ........................................... 42
Figure 3-4: Sequence of analyses reported in Section 3.3 ........................................... 63
Figure 3-5: Measurement model for Cognition ......................................................... 69
Figure 3-6: Measurement model for Affect for Integration ........................................... 71
Figure 3-7: Measurement model for Affect for Unification ........................................... 73
Figure 3-8: Measurement model for Evaluation ......................................................... 75
Figure 3-9: Sequence of analyses reported in Section 3.4 ........................................... 76
Figure 3-10: The dimensionality of European belief system ...................................... 77
Figure 3-11: Attitude structure of EU-related indicators in the EES 1994 ... 84

Chapter 4
Figure 4-1: Assessing the point of access of external factors ................................. 94
Figure 4-2: Hybrid model combining measurement and structural model ......................... 95
Figure 4-3: Non-recursive modelling of reciprocal effects ........................................... 98
Figure 4-4: Feed-forward model and feedback model ................................................. 99
Figure 4-5: Structural and measurement model of Cognition .................................... 104
Figure 4-6: Structural and measurement model of Affect for Integration ...................... 108
Figure 4-7: Structural and measurement model of Affect for Unification ....................... 110
Figure 4-8: Structural and measurement model of Evaluation ................................... 113
Figure 4-9: Schematic representation of the non-recursive model ............................. 118
Figure 4-10: Model type I: The institution-oriented Idealist ..................................... 124
Figure 4-11: Model type II: The performance-oriented Idealist .................................. 128
Figure 4-12: Model type III: The responsive Idealist ................................................. 130
Figure 4-13: Model type IV: The responsive Pragmatist ........................................... 132

Appendix C
Figure C-1: The model of Cognition ........................................................................... 171
Figure C-2: The model of Affect for Integration ......................................................... 174
Figure C-3: The model of Affect for Unification .......................................................... 178
Figure C-4: The model of Evaluation ........................................................................... 181
Figure C-6a: Country means of factor scores for Cognition ........................................ 185
Figure C-6b: Country means of factor scores for Evaluation ....................................... 185
Figure C-6c: Country means of factor scores for Affect for Integration ............... 186
Figure C-6d: Country means of factor scores for Affect for Unification ............... 186
Appendix D
Figure D-2a: Country models type I:
The institution-oriented Idealist ........................................................................ 196
Figure D-2b: Country models type II:
The performance-oriented Idealist ..................................................................... 197
Figure D-2c: Country models type III:
The responsive Idealist .................................................................................... 197
Figure D-2d: Country models type IV:
The responsive Pragmatist .............................................................................. 198

2 Tables

Chapter 2
Table 2-1: Data types according to Coomb's theory of data ......................... 21
Table 2-2: The European Election Study 1994: the 15 publics analysed ... 30

Chapter 3
Table 3-1: Factor analysis on EU-related beliefs ............................................... 40
Table 3-2: The Exposure scale ............................................................................... 46
Table 3-3: The Knowledge scale ............................................................................. 48
Table 3-4: The Interest scale .................................................................................. 49
Table 3-5: The Europeanness scale ......................................................................... 50
Table 3-6: The Policies scale .................................................................................. 51
Table 3-7: The Federalism scale .............................................................................. 52
Table 3-8: The Parliamentarism scale ..................................................................... 54
Table 3-9: The Citizenship scale ............................................................................. 55
Table 3-10: The Federal Representation scale .................................................... 56
Table 3-11: The Confederal Representation scale ............................................... 57
Table 3-12: The European Monetary Union (EMU) scale ............................... 58
Table 3-13: The Parliamentary Control scale ...................................................... 59
Table 3-14: Single-item measures ........................................................................... 61
Table 3-15: Correlations between European attitude measures ..................... 64
Table 3-16: Indicators loading on Cognition ......................................................... 69
Table 3-17: Indicators loading on Affect for Integration ........................................ 71
Table 3-18: Indicators loading on Affect for Unification ....................................... 73
List of Figures and Tables

Table 3-19: Indicators loading on Evaluation ........................................ 75
Table 3-20: Correlations between European attitude dimensions .......... 78

Chapter 4
Table 4-1: Comparison of direct effects on Cognition ......................... 101
Table 4-2: Comparison of direct effects on Affect for Integration .......... 106
Table 4-3: Comparison of direct effects on Affect for Unification .......... 109
Table 4-4: Comparison of direct effects on Evaluation ......................... 112
Table 4-5: Comparison of direct effects of Left-right self-placement ....... 116
Table 4-6: Pair-wise non-recursive models ......................................... 120
Table 4-7: Patterns of dominant effects .............................................. 123
Table 4-8: Model type I:
  Total effects of change on Affect for Integration .......................... 127
Table 4-9: Model type II:
  Total effects of change on Evaluation ........................................ 129
Table 4-10: Model type III:
  Repeated loop effects on Affect for Unification ............................ 131
Table 4-11: Model type IV:
  Repeated loop effects on Affect for Integration ............................ 132
Table 4-12: Comparison of total effects of change .............................. 134

Appendix A
Table A1-1: Indicators and determinants of Cognition ......................... 153
Table A1-2: Indicators and determinants of Affect for Integration .......... 155
Table A1-3: Indicators and determinants of Affect for Unification .......... 157
Table A1-4: Indicators and determinants of Evaluation .......................... 158
Table A2-1: Sequence of questions in the questionnaire ....................... 161

Appendix B
Table B1-1: The Exposure scale in w1 ............................................. 163
Table B1-2: The Interest scale in w3 .............................................. 163
Table B1-3: The Europeanness scale in w1 and w3 .............................. 164
Table B1-4: The Policies scale in w1 and w2 .................................. 164
Table B1-5: The Federalism scale in w1 and w2 ................................ 165
Table B1-6: The Parliamentarism scale in w1 and w2 ......................... 165
Table B1-7: The Citizenship scale in w1 and w2 ............................... 165
Table B1-8: The Federal Representation scale in w3 ........................... 166
Table B1-9: The Confederral Representation scale in w3 ..................... 166
Table B1-10: The EMU scale in w1 and w2 .................................... 166
Table B2-1: The Satisfaction with democracy scale in w1, w2 and w3 .... 167
Table B2-2: The Representation scale in w3 and w4 .......................... 167
Table B3-1: The Europeanness scale across time, 1978-1998 ................. 168
Table B3-2: The Interest scale across time, 1988-1994 ...................... 169
Table B3-3: Europeanness scale in Norway, Finland, Sweden, and Austria, 1990-1995 .............................................. 169
Appendix C

Table C-1a: The measurement model of Cognition ........................................... 172
Table C-1b: The structural model of Cognition ............................................... 173
Table C-2a: The measurement model of Affect for Integration ......................... 175
Table C-2b: The structural model of Affect for Integration .............................. 176
Table C-2c: The country-specific structural model of Affect for Integration for Denmark .................................................. 177
Table C-3a: The measurement model of Affect for Unification ........................ 179
Table C-3b: The structural model of Affect for Unification .............................. 180
Table C-3c: The country-specific structural model of Affect for Unification for Denmark .................................................. 180
Table C-4a: The measurement model of Evaluation ........................................ 182
Table C-4b: The structural model of Evaluation .............................................. 183
Table C-5: Correlations between European attitude dimensions ..................... 184

Appendix D

Table D1-1: The non-recursive models for Denmark
(comparative model) .............................................................................. 188
Table D1-2: The non-recursive models for Denmark
(country-specific model) ..................................................................... 188
Table D1-3: The non-recursive models for Great Britain .............................. 189
Table D1-4: The non-recursive models for Northern Ireland ....................... 189
Table D1-5: The non-recursive models for Ireland ..................................... 190
Table D1-6: The non-recursive models for East Germany ............................ 190
Table D1-7: The non-recursive models for West Germany ............................ 191
Table D1-8: The non-recursive models for the Netherlands ........................ 191
Table D1-9: The non-recursive models for Flanders .................................. 192
Table D1-10: The non-recursive models for Wallonia ................................. 192
Table D1-11: The non-recursive models for Luxemburg .............................. 193
Table D1-12: The non-recursive models for France .................................... 193
Table D1-13: The non-recursive models for Italy ....................................... 194
Table D1-14: The non-recursive models for Spain ...................................... 194
Table D1-15: The non-recursive models for Portugal ................................. 195
Table D1-16: The non-recursive models for Greece .................................... 195
