Contents

Chapter 1  Sexual motivation: A psychophysiological approach
            Introduction  7
            Concepts of sexual motivation: From drive towards
            incentive motivation  9
            Emotions as motivators  15
            Neurobiological mechanisms of emotion and
            Motivation  16
            Sexual excitement, sexual desire, and sexual action  22
            Modulation of spinal reflexes as a window on the
            generation of action  24
            Objectives and outline of the thesis  26

Chapter 2  Modulation of spinal reflexes by aversive and
            sexually appetitive stimuli
            Abstract  29
            Introduction  30
            Method  34
            Results  41
            Discussion  48

Chapter 3  Modulation of spinal reflexes by sexual stimuli of
            increasing intensity
            Abstract  53
            Introduction  54
            Method  57
            Results  62
            Discussion  67
Chapter 4  Sexual behavior and responsiveness to sexual stimuli following laboratory induced sexual arousal
Abstract  71
Introduction  72
Experiment 1 75
Method  75
Results  81
Discussion  86
Experiment 2 87
Introduction  87
Method  91
Results  95
General discussion  105

Chapter 5  Effect of a single dose of levodopa on sexual response in men and women
Abstract  111
Introduction  112
Method  115
Results  123
Discussion  131

Chapter 6  Summary and general discussion
The elicitation of action tendencies by sexual stimuli:
Summary of the hypotheses and findings  137
Conclusions  140
Limitations and future directions  145
Clinical implications  147

References  153
Samenvatting (Dutch Summary)  169
Acknowledgments (Dankwoord)  183
