

Corrections and Addendum

In chapter 5 “Suprachiasmatic nucleus interaction with the Arcuate nucleus; Essential for organizing physiological rhythms” on page 111, looking at the caption of **Figure 3**, the top line of the text is missing. It should read: **“Figure 3. In RC-cut animals corticosterone rhythm was lost while melatonin remained intact similar to SCN rhythmicity. Rhythm of ARC Per1 expression.....”**.

In chapter 5 “Suprachiasmatic nucleus interaction with the Arcuate nucleus; Essential for organizing physiological rhythms” on page 114, **Figure 5** is missing. It should be as pictured below.

Frederik Buijs regrets these errors.
