List of Tables

Table 2.1  Child-Care Coverage in Japan: Proportion of Children Who Are in Authorised Day Nurseries and Kindergartens to the Corresponding Age of Children .............................................. 14
Table 2.2  A Brief History of Family Policy in Japan .............................................. 21
Table 2.3  The Japanese Tax System and Family Income .............................................. 25
Table 2.4  Part-Time Employment in Japan ......................................................... 28
Table 2.5  Actual Hours Worked per Week by Regular and Non-Regular Workers in Japan in 2001, All Employees ......................................................... 29
Table A.2.1  Employment Rates of Married (or Cohabiting) Women with Children under Six Years Old in 1989 and 1999 ......................................................... 36
Table A.2.2  Summary Indicators of Formal Child-Care Coverage and Maternity Leave in Selected OECD Countries ......................................................... 37
Table 3.1  Data Sources and Observation Periods ............................................. 47
Table 3.2  Multinomial Logit Model of Mothers' Employment Status from the Year of Birth of the First Child to Five Years after the Birth in Japan .............................................. 62
Table 3.3  Multinomial Logit Model of Mothers' Employment Status from the Month of Birth of the First Child to 60 Months after the Birth in Britain .............................................. 63
Table 3.4  Multinomial Logit Model of Mothers' Employment Status from the Month of Birth of the First Child to 60 Months after the Birth in West Germany .............................................. 64
Table 3.5  Multinomial Logit Model of Mothers' Employment Status from the Month of Birth of the First Child to 60 Months after the Birth in Sweden .............................................. 65
Table 3.6  Binary Logit Model of Mothers’ Employment Status from the Month of Birth of the First Child to 60 Months after the Birth in the Netherlands .............................................. 66
Table 3.7  Predicted Probability of Employment Status of Mothers according to Educational Levels and Whether the Child Was Born in the 1980s or the 1990s .............................................. 69
Table A.3.1  Number of Observations in the Sample according to Educational Levels and Whether the Birth Occurred in the 1980s or 1990s .............................................. 75
Table A.3.2  Description of the Employment Status for Britain, Germany, the Netherlands and Japan .............................................. 76
Table A.3.3  Data Description of the Employment Status for Sweden .............................................. 77
Table A.3.4  Means of Independent Variables in Table 3.2 (Japan) .............................................. 78
Table A.3.5  Means of Independent Variables in Table 3.3 (Britain) .............................................. 78
Table A.3.6  Means of Independent Variables in Table 3.4 (West Germany)........ 79
Table A.3.7  Means of Independent Variables in Table 3.5 (Sweden)............ 79
Table A.3.8  Means of Independent Variables in Table 3.6 (The Netherlands).... 80
Table A.3.9  Mean Age of Mothers at First Birth according to Educational Levels and Whether Birth Occurred in the 1980s or in the 1990s.............. 81
Table 4.1  Part-Time Employment in Percentage of Total Employment in the European Union, Japan and the United States................................. 86
Table 4.2  Proportion in Total Employment of Employees with a Fixed-Term Contract in the EU, Japan and United States............................................ 88
Table 4.3  Employment by Type of Contract and Whether Working Full-Time (FT) or Part-Time (PT), 1998................................................................. 98
Table 4.4  Multinomial Logit Analysis: Relative Probability of Employment States for Both Sexes................................................................. 101
Table 4.5  Multinomial Logit Analysis: Relative Probability of Employment States for Men................................................................. 103
Table 4.6  Multinomial Logit Analysis: Relative Probability of Employment States for Women................................................................. 104
Table 4.7  Medians of Hourly Wages in National Currency, 1998.................... 109
Table 4.8  OLS Regressions of the Logarithm of the Hourly Wage in National Currency for Both Sexes................................................................. 110
Table 4.9  OLS Regressions of the Logarithm of the Hourly Wage in National Currency for Men................................................................. 111
Table 4.10 OLS Regressions of the Logarithm of the Hourly Wage in National Currency for Women................................................................. 112
Table A.4.1  Employment Status by Sex, 1998........................................ 118
Table A.4.2  Descriptive Statistics (the means of explanatory variables): Men Who Are Gainfully Employed........................................ 119
Table A.4.3  Descriptive Statistics (the means of explanatory variables): Women Who Are Gainfully Employed........................................ 120
Table 5.1  Total Fertility Rate in Selected Countries, 1960-2000.................... 130
Table 5.2  Mean Age of Women at Birth of the First Child in Selected Countries, 1960-2000................................................................. 133
Table 5.3  Mean Age of Mothers at First Birth by Time Period in which the First Child Was Born and Educational Levels in Britain, Germany, the Netherlands and Sweden................................................................. 144
Table 5.4  Mean Age of Women when Finishing Education or Training by Cohort and Educational Level in Britain, Germany, the Netherlands and Sweden................................................................. 147
Table 5.5  Model 1: Cox Proportional Hazard Model, Duration until Giving Birth to the First Child since Age 15........................................ 155
Table 5.6  Model 2: Cox Proportional Hazard Models, Duration until Giving Birth to the First Child since Finishing Education................. 157
Table A.5.1  The Number of Observations Used in the Analyses.................. 160
Table 6.1  Mothers’ Hourly Wage Estimations (Random Effects Model, 1993-97)................................................................. 175
Table 6.2  Cox Proportional Hazard Estimations of the Duration from Age 15 until the Birth of the First Child................................. 184
Table 6.3  Cox Proportional Hazard Estimations of the Duration from the Time at Finishing Education until Birth of the First Child........ 186
Table A.6.1  Trends in the Distribution of First Births by Age of the Mother and Marital Information in Japan, 1970-2000....................... 189
Table A.6.2  Summary Statistics on Mothers’ Hourly Wages (Pooled data, 1993-97).................................................................. 190
Table A.6.3  Probit Estimations on Selection into Employment for Table 6.1 191
Table A.6.4  Number of Observations in Figures 6.1-6.4 ......................... 192
Table A.6.5  Means of Explanatory Variables in Tables 6.2 and 6.3............ 193
