Contents

INTRODUCTION
1 Algebraic curves and their moduli .......................... 9
2 Complete subvarieties ............................................. 11
3 Results ............................................................. 12
4 Speculations ......................................................... 13

CHAPTER 1 Overview of known results 15
1.1 Complete subvarieties: a survey ................................. 15
1.1.1 Constructions of complete curves in $M_g$ ................. 15
1.1.2 Bounds on the dimension of complete subvarieties ....... 18
1.1.3 Examples of higher-dimensional complete subvarieties ... 19
1.2 Some calculations .................................................. 21
1.2.1 Kodaira's construction revisited ............................. 21
1.2.2 The construction of González-Diez and Harvey revisited ... 23

CHAPTER 2 Explicit complete subvarieties of dimension $d$ in $M_{2d+1}$ 29
2.1 The basic step ...................................................... 29
2.2 A refinement ....................................................... 32
2.3 Minimality of the construction .................................. 32

CHAPTER 3 Explicit complete curves in the moduli space of curves of genus three 35
3.1 The construction ................................................... 36
3.2 The corresponding family of curves ............................. 37
3.3 Pryms of ramified double coverings of genus 3 curves ...... 39
3.4 The degree of $\lambda$ and the number of hyperelliptic fibers .... 41
3.5 The surjectivity of the Prym map ................................. 44

CHAPTER 4 A complete surface in $M_6$ in characteristic $> 2$ 47
4.1 The construction ................................................... 47
4.2 Blowing down the diagonal ....................................... 48
4.3 Characteristic 0 ..................................................... 50

CHAPTER 5 Families of curves without sections 51
5.1 Basic construction ................................................ 51
5.2 A family of smooth curves without sections ................... 53
CHAPTER 6 Some results on complete surfaces 55
  6.1 Complete surfaces in $M_g$ and the classification of surfaces ............ 55
  6.2 Surfaces in the locus of curves with nontrivial automorphisms ......... 57

CHAPTER 7 Speculations 61
  7.1 The genus of the base curve ............................................... 61
  7.2 Can $M_4$ contain a complete surface? .................................. 63
  7.2.1 A computation in the Chow ring of $M_4$ ............................. 63
  7.2.2 The Prym construction for $M_4$ ....................................... 64
  7.2.3 Diaz's filtration of $M_4$ ............................................... 65
