Contents

INTRODUCTION ........................................... 9
  1 Algebraic curves and their moduli ......................... 9
  2 Complete subvarieties ................................ 11
  3 Results .............................................. 12
  4 Speculations ........................................ 13

CHAPTER 1 Overview of known results ..................... 15
  1.1 Complete subvarieties: a survey ....................... 15
    1.1.1 Constructions of complete curves in $M_g$ .......... 15
    1.1.2 Bounds on the dimension of complete subvarieties .... 18
    1.1.3 Examples of higher-dimensional complete subvarieties . 19
  1.2 Some calculations .................................. 21
    1.2.1 Kodaira's construction revisited ................. 21
    1.2.2 The construction of González-Diez and Harvey revisited 23

CHAPTER 2 Explicit complete subvarieties of dimension $d$ in $M_{2d+1}$ 29
  2.1 The basic step .................................... 29
  2.2 A refinement ...................................... 32
  2.3 Minimality of the construction ..................... 32

CHAPTER 3 Explicit complete curves in the moduli space of curves of genus three 35
  3.1 The construction .................................. 36
  3.2 The corresponding family of curves .................. 37
  3.3 Pryms of ramified double coverings of genus 3 curves .... 39
  3.4 The degree of $\lambda$ and the number of hyperelliptic fibers ... 41
  3.5 The surjectivity of the Prym map ................... 44

CHAPTER 4 A complete surface in $M_6$ in characteristic $>2$ 47
  4.1 The construction .................................. 47
  4.2 Blowing down the diagonal ........................ 48
  4.3 Characteristic 0 .................................. 50

CHAPTER 5 Families of curves without sections ............... 51
  5.1 Basic construction ................................ 51
  5.2 A family of smooth curves without sections .......... 53
CHAPTER 6 Some results on complete surfaces 55
  6.1 Complete surfaces in $M_g$ and the classification of surfaces ............ 55
  6.2 Surfaces in the locus of curves with nontrivial automorphisms ......... 57

CHAPTER 7 Speculations 61
  7.1 The genus of the base curve ............................................. 61
  7.2 Can $M_4$ contain a complete surface? ................................ 63
  7.2.1 A computation in the Chow ring of $M_4$ ............................ 63
  7.2.2 The Prym construction for $M_4$ ..................................... 64
  7.2.3 Diaz's filtration of $M_4$ ............................................. 65
