ACKNOWLEDGEMENTS

Many have contributed to the completion of this book, in many different ways. Working on this study, in a new environment, was made possible with the help and support of many persons.

I would like to express my deep gratitude to my supervisor and promoter, Prof. Dr Gert Rijlaarsdam. Dear Gert, thank you very much for accepting me as your Ph.D student. When I started this research project, I had no knowledge and experiences of doing any empirical research. You have helped me see how to become a researcher and how to cooperate with other researchers. I appreciate your supervision. You spent your valuable time during your weekends and vacations reading and giving me your feedback on the drafts of sections and chapters in this book. I remember well the question you often asked me, "*Does it ring a bell for you, Lap?*" when you wanted to make sure that the issue under discussion was clear to me. You set a good example of a very responsible supervisor to me. At the start of the first experiment in Can Tho in November 2002, you arranged your time and made an ultimate short visit to Vietnam, just to make sure that all research activities were going fine. During the past years working on this research, I have gone through good and bad times. You have been always there to support me, "*Be strong, Lap*". Without your support, this book would not have been completed. My special thanks also go to Hetty Rijlaarsdam for her hospitality and kindness.

I acknowledge Dr Peter Bimmel who supervised the theoretical background of this research. Dear Peter, what a luck I had to meet your expertise in learner autonomy and foreign language methodology. Thank you so much for your supervising, reading and giving me valuable feedback on the theoretical chapters of my book. My special thanks go to Martine Yates MA for all her work checking and making proposals on improving the English language used in this book. Dear Martine, working with me, you encouraged me to trust myself that I could become a better writer in English.

My thanks go to Nuffic from which I was granted the fellowship to conduct this research. I am thankful to Prof. Dr Le Phuoc Loc, Drs Willem Bustraan, Drs Riny van Krieken, Dr Jan Beenakker, Truong Vo Dung MA and Bui Anh Kiet MA the steering MHO4 committee members who created the opportunity and supported my work on this project. Dear Dr Loc, thank you very much for your feedback on my initial research proposal. Your feedback helped me gain insight into improving that version of the proposal so that I could be accepted as a Ph.D student at the Graduate School of Teaching and Learning (ILO, UvA). Dear Willem and Riny, I highly acknowledge all the work arrangements you did concerning my project research and the time you spent for and on me during my stay in the Netherlands. Be advised that I have made the best out of this opportunity. I enjoyed the good time being with your families. I would like to send my hearty thanks to both of you and to Bep Harskamp, Philip Warners, Marijn Warners, and Roemer Warners who made my time in
