# Contents

Chapter 1  
General introduction and outline of the thesis  
*Based on New England Journal of Medicine 2002; 347: 1963-1965*

Part I: Lipids, Lipoproteins and Apolipoproteins

Chapter 2  
Molecular variation at the apolipoprotein B gene locus in relation to lipids and cardiovascular disease; a systematic meta-analysis  
*Human Genetics 2003; 113: 417-425*

Chapter 3  
The ratio of apolipoproteins B to A-I and the risk of future coronary artery disease in apparently healthy men and women; the EPIC-Norfolk prospective population study  
*Submitted*

Chapter 4  
CETP gene variation: relation to lipid parameters and cardiovascular risk  
*Current Opinion in Lipidology 2004; 15: 393-398*

Chapter 5  
The cholesteryl ester transfer protein (CETP) TaqIB variant, HDL cholesterol levels, cardiovascular risk and the efficacy of pravastatin treatment; an individual patient meta-analysis of 13,677 subjects  
*Circulation 2005; 111: 278-287*

Chapter 6  
Plasma levels of cholesteryl ester transfer protein and the risk of future coronary artery disease in apparently healthy men and women; the prospective EPIC-Norfolk population study  
*Circulation 2004; 110: 1418-1423*

Chapter 7  
CETP, HDL-c, and cardiovascular risk: Will CETP inhibition translate into cardiovascular risk reduction?  
*Arteriosclerosis Thrombosis and Vascular Biology 2005; In Press*
Part II: Oxidation and Inflammation

Chapter 8  
Serum levels of type II secretory phospholipase A2 and the risk of future coronary artery disease in apparently healthy men and women; the EPIC-Norfolk prospective population study  
*Arteriosclerosis Thrombosis and Vascular Biology 2005; In Press*

Chapter 9  
Variants of toll-like receptor 4 modify the efficacy of statin therapy and the risk of cardiovascular events  
*Circulation 2003; 107: 2416-2421*

Chapter 10  
IL-8 plasma concentrations and the risk of future coronary heart disease in apparently healthy men and women; the EPIC-Norfolk prospective population study  
*Arteriosclerosis Thrombosis and Vascular Biology 2004; 24: 1-7*

Chapter 11  
Macrophage migration inhibitory factor and the risk of myocardial infarction or death due to coronary artery disease in adults without prior myocardial infarction or stroke; the EPIC-Norfolk prospective population study  
*American Journal of Medicine 2004; 117: 390-397*

Chapter 12  
C-reactive protein and the prediction of coronary artery disease incidence and mortality in apparently healthy men and women; the EPIC-Norfolk prospective population study 1993-2003  
*Submitted*

Part III: Coagulation and Fibrinolysis

Chapter 13  
Interaction between a genetic variant of the platelet fibrinogen receptor and fibrinogen levels in determining the risk of cardiovascular events.  
*American Heart Journal 2004; 147: 181-186*
Chapter 14
Genetic variation in coagulation and fibrinolytic proteins and their relation with acute myocardial infarction; a systematic review
*Circulation* 2001; 104: 3063-3068

Chapter 15
Fibrinogen plasma levels, the factor XIII Val34Leu variant and the risk of future coronary artery disease; the EPIC-Norfolk prospective population study
*Interim analysis*

Summary and conclusion
