Without the help and support from the following people (and in 5 years you come across a lot of nice people!!!!!!) you would not have this book in your hands at this moment.....

Jaap-Jan: one thing I can say for sure...it has never been monotonous to work with you! With your great enthusiasm sometimes it was difficult to keep focused on the main goal of our research but you always gave me the freedom to follow my interests and ideas and I learned a lot from that. I guess you also learned from me, especially on how to deal with an ao deep... I provided several opportunities for you to do so. And, every time, you were able to make me look at the bright side of the situation...even now with the promotion arrangements. Thanks a lot!

Dirk: It has been a great pleasure to work under your supervision. I have learned a lot from you. I am sure my scientific english has greatly improved after you corrected all my abstracts and papers. In these last months I have been bothering you several times with all the promotion troubles and you were always there to help me. Thank you!

Peter: I came in your group just like that...however, since the beginning you made me feel welcome. I really appreciated that. It was very fruitful to work in your group. I have learned a lot, not only theory but also all kinds of techniques. I have also learned how a science group should work. I think you are doing a great job with the development of MCB. Thanks a lot!!!

The group in Utrecht: I have started my PhD research working with you guys and it was a great start. The atmosphere in the lab was very nice, as well as during the work discussions. I enjoyed it a lot. Leo: your enthusiasm is contagious; it was nice to work in your group. Thank you for revising my thesis and for accepting being part of the reading committee. Laurien: I have never met someone with so much energy as you! It was really great working with you! You showed me how to perform a perfusion experiment remember? The first time it seemed so complicated! I have great memories of the meetings that we attended together, the huge amount of bridges in Dusseldorf (at least it looked like the place had hundreds of them!) and the "delicious" pretzels that you could so "easily" eat....the new ways of ordering wine in Lake Tahoe, after-congress party, skiing lessons, surfers in San Francisco's beaches...It has been fun! Besides the fun you were always willing to share your knowledge with me, even now. Thanks! Paul, Sandra, Miranda, Jan, Deon, Lei, Cornelieke, Corneli, Lisa, Bart, Belinda, Evert thank you all for providing the "gezelligheid" in the group.

The group in Amsterdam: we are still one group, right? I really had fun with you guys! The "heel gezellig" P114, now P112, was sometimes the most unsuitable place to work however, with respect for each other and a good laugh we always managed to keep focused (of course that was too much to ask on Friday afternoons!!!!!!). Jaap: on my first day at the CLB I had a coffee mug on my desk, with my name on it and a note saying welcome to IHE... that was so sweet of you! The meetings in Geneva were just great (a man among the women....) and the truth is that you can gossip as good as a woman!!! When you left, the lab was not so noisy anymore but, even then, there was, once in a while, an mp3 file coming directly from Chapel Hill to remind me how good the Boss is!!!! I missed you. Mar: the incarnation of the south-european temperament! We had good times together, like that evening with the girls and a personal salsa instructor, our long dinners in the most gezellig restaurants in Amsterdam, the meeting in Geneva, shopping in the Haarlemmerstraat with Daniel. I hope we will keep in touch once I leave the CLB. Thanks for all the help in the lab, especially with that d**ned PSGL-1 paper!

Paula: the super mom! Not only you manage to take care of your wonderful children but you still have the time to worry with all of us, you are one of a kind. I always enjoyed our conversations about life, families, kids ("short long" trip from Maastricht to Utrecht); you have always been there for advice and for help...Thanks! Erik: we always made of an afternoon isolating HUVEC, an afternoon of gossiping and fun. Thanks for teaching me the isolation methods and helping me all the time with the confocal and especially now with the new system, you’ve been great! And of course I would also like to mention the rest of the group who was always willing to help and made everything much easier: Jup, Janine, Willy, Marloes, Marion, Eloise, Edwin, Sandra, Franca, Sasha, Sander, Sven, Daphne. Thank you all. The people from P112: bedankt allemaal voor de lekkere (soms) muziek en de graapjes op het lab.

Some people who left the CLB: Kirsten: it was nice getting to know you. We both have learned from the good and bad times we shared. Thank you for everything. Anna: the Finnish student... I really enjoyed having you on my project. Good luck with your own research and preparing everything for the wedding! Maarten, de altijd gezellige Maarten! With our research not having much in common we still managed to have a lot of topics to discuss over a coffee in the coffee room: the art of good cooking, the art of eating good food, the art of drinking good wine, the art of preparing great Christmas dinners, the art of enjoying life!!! Altijd gezellig! Next time Portuguese food in Utrecht!

I am also grateful to the people from other labs/institutes that helped me with my most difficult chapter...Hans van Thienen and Juan Garcia-Vallejo, thank you both!!!!

Friends: Of course these can never be forgotten, especially when they made my time in Holland much easier. I have made great friends during these last years. Mieke&Rody, Mark&Maria, and Marcel&Inger: thank you all of you for the great weekends, for the great nights in Amsterdam, Groningen and Utrecht! I had a lot of fun with you in the last 5 years! Inger, thanks for those tickets!!

Paranymphs: Magdalena: we know each other since the beginning of my PhD and therefore we have been through each other’s good and bad moments together. No one better to be besides me on the big day! Thanks for everything and I wish you all the luck with finishing your own book. Rachel: we know each other now for 2 years, however I feel like we have always been good friends. We had great times together: the meetings in Lunteren, Noordwijkerhout and Geneva, the shopping in Amsterdam, the horror movie on a dark, snowy end of the day.... good laughs during a sailing weekend... Thank you for helping me with all the preparations. Next step will be....shopping!!!!!!!!

I would like to thank all the support I have received from my family in The Netherlands, especially from Ma and Pa. You have been great!

To my family: papá, mamã, não passou um dia nos últimos 5 anos que eu não tenha pensado em vocês. Tive (e tenho) muitas saudades e por vezes não foi nada fácil resistir à tentação de apanhar o primeiro avião e ir-vos visitar só para vos dar um beijinho! Vocês sempre me apoiaram, mesmo quando as minhas decisões implicaram ir viver para longe. Não há palavras suficientes para vos dizer o quanto eu tenho orgulho em ser vossa filha e o quanto eu vos estou agradecida. Amo-vos muito. E.... papá, afinal sempre tens uma filha doutora!!!! Liliana: Perdi muita coisa ao não estar ai, tu a ires para a faculdade, tu a seres
praxada, a tua queima das fitas, o teu primeiro emprego... no entanto nunca me senti posta
de lado por estar longe. Espero que continuemos assim, sempre a telefonar ou a enviar
mensagens. Nunca pensei dizer isto mas...tenho muitas saudades tuas.

Jan, it doesn’t matter what I might say here, it will never be enough to tell you how important
you were in the making of this book. Maar ik wil wel iets zeggen en als altijd in het
nederlands, english, e portugues...

When tenderness
seems tired at last of its offices,

and sleep, that most uncertain vessel,
still delays,

when blue bursts from your eyes

and searches mine
for steady seamanship

then it is I speak to you of words
desolate, derelict,

transfixed by silence...

Dank je. Amo-te muito.
