## Contents

### Chapter 1: Introduction

1.1 Phototinduced electron transfer processes 4
   1.1.1 Thermodynamical considerations 5
   1.1.2 Kinetic considerations 6

1.2 Electronic energy processes 9
   1.2.1 Förster-type energy transfer 9
   1.2.2 Dexter-type energy transfer 10

1.3 Pyrene as electron- or energy donor or acceptor 11
   1.3.1 Pyrene as electron donor or acceptor 12
      1.3.1.a Pyrene as electron donor 12
      1.3.1.b Pyrene as electron acceptor 15
   1.3.2 Pyrene as energy donor or acceptor 16
   1.3.3 Pyrene involved in electron and energy transfer 18
   1.3.4 Conclusion 19

1.4 Scope of the Thesis 20

1.5 References 27

### Chapter 2: Extending excited state lifetimes by interchromophoric triplet state equilibration in a pyrene-Ru(II)diimine- dyad system

2.1 Introduction 30

2.2 Synthesis 31

2.3 Electronic absorption spectra 32

2.4 Luminescence spectroscopy 33

2.5 Transient absorption spectroscopy 38

2.6 Conclusion 41
   Final remarks 42

2.7 Experimental section 43

2.8 References 44
### Chapter 3: Electronic energy transfer in dinuclear metal complexes containing meta-substituted phenylene unit

- **3.1** Introduction
- **3.2** Results and discussion
- **3.2.1.** Synthesis
- **3.2.2.** Photophysical properties
  - **3.2.3.a.** UV/visible absorption spectroscopy
  - **3.2.3.b.** Steady state luminescence
  - **3.2.3.c.** Time resolved spectroscopy
- **3.3** Conclusion
- **3.4** Experimental part
- **3.5** References

### Chapter 4: Enhancement of Intra-Ligand Charge-Transfer character induced by Zinc (II) complexation in terpyridine-pyrene system

- **4.1** Introduction
- **4.2** Synthesis
- **4.3** Electrochemistry
- **4.4** UV/visible absorption
- **4.5** Luminescence study
- **4.6** Estimation of excited state dipole moment
- **4.7** Transient absorption spectroscopy
- **4.8** Conclusions
- **4.9** Experimental part
- **4.10** References

### Chapter 5: ‘Y-shaped’ ruthenium bisterpyridine derivatives for Non Linear Optics

- **5.1** Introduction
- **5.2** Background on nonlinear optics
- **5.3** Synthesis and characterization of the functionalized ruthenium bisterpyridine complexes
Chapter 6: Electrochemical and photophysical properties of Ruthenium(II) bipyridyl complexes with pendant alkanethiol chains in solution and anchored to metal surfaces

6.1 Introduction
6.2 Results and discussion
  6.2.1. Synthesis
  6.2.2. Photophysical properties in solution
  6.2.3. Electrochemical characterization of the complexes in solution and as self-assembled layers
  6.2.4. Photophysics of the functionalized surfaces
6.3 Conclusions
6.4 Experimental part
6.5 References

Chapter 7: Oligothia dendrimers for the controlled formation of gold nanoparticles

7.1 Introduction
7.2 Results and discussion
  7.2.1. Synthesis of the ligand and nanoparticle formation
  7.2.2. UV/visible absorption spectroscopy
  7.2.3. $^1$H-NMR analysis
  7.2.4. High resolution transmission electron microscopy
7.3 Conclusions
7.4 Experimental part
7.5 References
Chapter 8: Instrumentation and experimental methods

8.1 Steady state absorption and emission measurements  170
8.2 Time resolved spectroscopy measurements  170
  8.2.1. Time resolved fluorescence  170
     8.2.1.a. Nanosecond time scale  170
     8.2.1.b. Picosecond time scale  171
  8.2.2. Time resolved absorption  171
     8.2.2.a. Nanosecond time scale  172
     8.2.2.b. Sub-picosecond time scale  172
  8.2.3. Confocal microscopy  174
8.3 Nonlinear optic measurements  174
8.4 Electrochemistry  175
8.5 High resolution transmission electron microscopy  176
8.6 References  177
