Time flies so quickly!!! It is now my turn to end up with my thesis and to go on, entering really into real life.
It is, in consequence, time to thank many people who interacted with me and indeed, who helped me to achieve my work. Obviously, I would like first to thank my family who always supported me during difficult periods. Also, I deeply acknowledge my promotor, Prof. Luisa De Cola, to have given me to opportunity to work in her group. At this occasion, I would like to thank Dr. René Williams for the time he spent trying to understand my French-English writing and speaking: “congratulation to both of you for being able to stand me for these 42 months”. The EC (SUSANA: HPRN-CT-2002-00185) is also acknowledged, giving me the opportunity to fly all over Europe (and to Japan) to participate to meeting and to work in many different labs.
During all this work, numerous collaborations were carried out allowing me to train in other Universities.
Thank you very much to Prof. Vögtle for his hospitality and all the discussion we had in his office during my stay in Bonn. Jeroen, thank you for the shared room during SUSANA meetings and all the good moment we had together in Bonn (and also in Amsterdam).
I would like to acknowledge Prof. Schiffrin for accepting me twice in his lab and Iuliana with whom it was good to work and discuss with. I will always remember the Caverne Club step in Liverpool.
I also had the pleasure to work in the group of Prof. Belser in Fribourg. I will never forget this period working with Yoël (merci pour toute l’aide que tu m’as apporté et les nombreuses conversations que nous avons eu depuis) and VJ.
Also Dr. Frans Tichelaar is acknowledged for receiving me so many times and measuring with me HR-TEM in Delft.
Indeed, I want to thank people from Cachan (Professor Zyss and Doctor Isabelle Ledoux-Rak) for the hospitality, the help and the discussion we had in Paris.
Now, I would like to thank all my colleagues (and visitor students) with whom we shared so much time and good moment together. First, I want to acknowledge my two paronymfs, Alex (merci pour tous les moments passés ensemble: La vaaaacchhe) and Taasje (Thanks for all the good moment out of university and especially to not have said much a certain night in your place during the European Championship!!!), for accepting this really difficult task.
