"Take a deep breath ....."

Professor van Gulik, dear Thomas, it all started as a short laboratory visit to learn some Dutch.... I am very much honored that I was given the opportunity to promote under your supervision. Thank you for your never-ending support, constructive advice and enthusiasm during the last years. I am very thankful for the trust that you gave me to “do it my way”, either in Lapland or in Amsterdam. I hope that there will be also joint research projects between Amsterdam and Helsinki in the near future.

My co-promoters...
Dr van Vliet, Arlene, your role in my promotion project has steadily grown and expanded, from a co-promoter to an all-round crisis manager. Thank you for your boundless compassion, support and help. I could not have reached this far without you, thank you! Dr Bennink, Roel, working together with you has been one of the highlights of the last years. It is incredible how you, between your numerous other responsibilities, always managed to have time for me, even with the shortest notice and even during your vacation. Thank you!

Members of the promotion commission, prof. dr. D. J. Gouma, prof. dr. P. L. M. Jansen, dr. R. Hillegersberg, prof. dr. W. J. G. Oyen, prof. dr. J. Stoker and prof. dr. K. Höckerstedt, thank you for the evaluation of this manuscript and for your interest to be a member in my promotion committee.
Prof. dr. K. Höckerstedt, I am looking forward for my new challenges in the field of research with you!

My colleagues, co-workers and mates....
My roommates, Maarten and Deha, our co-habiting was short but very groovy. I hope I see both of you to promote in the near future! There must be already enough material for at least 4 books 'cause the articles just keep coming...
My research colleague's, the old and new; Maarten-Paul, Ivo, Geert, Peter, Annebeth, Sander, Maud, Suzanne, Paul, Benedict, Nikol, Wilmar, Gwen, Marie-Claire and Jaap. Because of you, doing research was actually “not too bad”! No matter what was going on with the experiments, it was always nice to come to the lab! You have created a special 'of course we will make it’ atmosphere in the lab that has helped me to pull it through. I wish you all the best in the future and I do hope that our paths cross some day. A particular thanks goes to Wilmar for the last push over the finishing line...
Ruurdtje, Lysbeth, Aniska, Tanja, thank you for the pleasant chats, seriously needed distraction, during last 4 years. Albert, my sport buddy, I hope you eventually will get that well-deserved trainers place by Ajax and live happily ever after. The offer to join "my" lab in Finland stands!
Adrie, you are solely responsible for the incredibly miniscule error bars in my experimental studies! Over 20 PHx per day, respect! Goos and Henk, you have taught me, better than any book, how you should work with animals. Kora, your flexibility and help was crucial to the accomplishment of many of my articles, thank you!

Andrea, the super-secretary, without you I would have lost the marbles already a thousand times. Thank you for all your help and especially helping to arrange my promotion from the distance! Peter, Esther and Linda, always there to bail me out and back me up!

**Friends,** in Amsterdam, Finland and all over the world, you are the safety net in my life. You have been my source of level-headedness and reality, always reassuring me that there is actually life beyond research and lab. Thank you for being there for me! Dear Päivi, I am happy that you stand next to me while I am defending my thesis. During our years abroad, your friendship has become even more irreplaceable for me! Too bad I have to go back alone...

**My family,** little sister Kaisa, mum and dad, thank you for your valuable encouragement during the last years. Mum and Dad, there are not enough words to thank you for the infinite and all-embracing support and believe in me, not least during our “little” summer house project. Chopping some cubes wood always helps in stress!

Finally, and most importantly, my heartfelt gratitude goes to my beloved Juul, for your ongoing love and for always being there for me. This book is also yours...

All colleagues and friends, even though not mentioned by name, you are not forgotten. Thank you!
