The outside in : questioning the use of electronic information services in organizations
Nouwens, J.C.A.R.

Citation for published version (APA):
Table of Contents

Chapter 1. Beyond the hype. The use of electronic information services
  1.1. The use of public, professional information
  1.2. Research question
  1.3. Outline

Chapter 2. Out of control? The ins and outs of environmental scanning
  2.1. The organizational environment: a pool of plenty
  2.2. Environmental scanning: a way to get informed
      Knowledge management: a way to share
  2.3. The relevance of environmental scanning for organizations and individuals
      Environmental characteristics: perceived uncertainty
      Organizational characteristics: size, age and strategic focus
      Organizational characteristics: the position of boundary spanners
  2.4. Conclusion: Out of control but not out of sight

Chapter 3. Blurring the boundaries. Technological possibilities for electronic information services
  3.1. Sources of environmental scanning
  3.2. Electronic publishing of information services; towards a definition
      Diversity of electronic information services
  3.3. The World Wide Web on the Internet
  3.4. Accessibility and interactivity
  3.5. Packaging: blurring the distinction between source and reference
  3.6. Distribution: combining consultation with allocation (alerting services)
  3.7. Distribution: combining consultation with conversation (communication)
  3.8. Support of use: the internal integration of networks (Intranets)
  3.9. Support of use: the external integration of networks (online communities)
  3.10. Conclusion

Chapter 4. Shooting on a moving target. A meta-analysis of existing research
  4.1. What is a meta-analysis?
  4.2. Purpose of the meta-analysis on the use of electronic information services
  4.3. Analysis of readings
  4.4. The empirical results
  4.5. Theoretical results
  4.6. Expert suggestions
  4.7. Accessibility: A follow-up
  4.8. An Epilogue
  4.9. Conclusion
7.10. Relationships and differences within cases

1-of-6: Differences between disciplines are dominant
2-of-6: Dissatisfied with infrastructure
TV News: Using under time pressure
Newspaper company: complaints about restricted policies on Internet
Labor-intensive industries: the Internet hype within the hotel & catering industry and the clothing & garment industry

7.11. Conclusion

Chapter 8. Opening up horizons. Summary and conclusions

8.1. Summary of research results
8.2. Times are changing
8.3. Theoretical implications of research results
8.4. What's next?

Appendices
A. List of references
B. Questionnaire
C. Variables & Relationships per case
D. Contact Summary Sheet (publishers)
E. Readings meta analysis
F. List of Tables & Figures
G. Author Index
H. Subject index
