When something profoundly new and unknown begins in your life, feelings such as happiness, anxiety, curiosity, uncertainty, hesitation and fear, mix all together. Four years ago when I decided to move from Brazil to start my PhD studies in Amsterdam I felt this initial burst of energy. It has given me the power to go on even through difficult moments. Now at the end of this path, I feel relieved, satisfied and fully happy about what I learned through this valuable experience.

There are many people who helped me in a direct or indirect way to achieve this aspiration. To all of them I would like to express my thanks for their encouragement, support, understanding and for just sharing moments that enriched my life.

Prof. Dr. Albert Feilzer, my Promotor, the one who made it possible. Dear Albert, your enthusiastic and easy way of resolving problems gave me the feeling that I could reach this beautiful goal. Thank you for your support, your guidance, your constructive criticism and above of all your trust. To you Albert, all my respect and consideration.

Prof. Dr. Rien van Waas; thank you Rien for opening the door of ACTA to me; I know it was a lot of bureaucratic work. Thank you for your trust and for giving me the opportunity to join the CAD/CAM team.

Prof. Dr. Robert Bausch, Prof. Dr. Bob ten Cate and Prof. Dr. Paul van der Stelt, members of my ‘Promotiecommissie’; thank you for your willingness to review
Acknowledgments

my thesis, it is an honor and a challenge to be judged by experienced researchers like you.

Prof. Dr.Ir. Jef M. van der Zel. Dear Jef, since my first days in this project, I felt that your enthusiasm and your clever way of thinking could support me in the difficult moments. Thanks Jef for the advice and ideas that you shared with me. I wish that you continue to stimulate other students with your positive energy.

Dr. Herman Hosman, Chef de Clinique Oral Implantology Clinic, ACTA in 2001. Dear Herman, you are a very open person that I respect a lot. Thank you for introducing me to the interesting world of implants and thanks to let me be part of your very spontaneous and humorous Master-group, it was an unforgettable experience that I always remember with great pleasure.

Eugenia Singer, my Mexican dentist friend. Dear Eugenia, without your help I could not make the clinical part of this study. It was a pleasure to meet you in Hoorn every week to evaluate the patients. My thanks also to ‘tandarts’ Jacques Dekker and his nice group of assistants, Ivone, Edith and Silvia.

The patients involved in the clinical part of this thesis. Thanks to each one of you, dear patients. You have made the clinical part of this thesis possible, so I am very grateful for your belief and your consideration regarding a new technique.

Irene Aartman, my friend, teacher and co-worker. Dear Irene, what a nice coincidence our breakfast together in Lunteren. At that moment, I was an ‘absoluut beginner’ and you were already an experienced researcher. Thank you for been so open and nice to me, I respect your strong personality and I am really amazed by your very sharp sense of analysis. Thank you for revising the statistical part of my entire thesis; it was a tough job.

Alma Đozić, ‘Alma mia’, my friend and my colleague. My dear Alma, since our first meeting I felt your sensible way of being that makes you a very unique person. You are an intelligent and hardworking woman and I respect all the effort you give to reach your goals. Our friendship is a beautiful gift that I will love to keep very close to
me. Sharing the room with you for more than two years has been an enriching experience, thank you for being there for me.

Cees Kleverlaan. Gracie Cees! Your knowledge about computers gave me a very safe feeling and prevented that I lose any priceless file. Many thanks to you for optimizing the lay-out of my thesis. You were also very helpful working on one of the chapters of this final work.

Arie Werner. Thank you Arie for teaching me how to work with the Scanning Electron Microscope. It was not easy to understand this complex machine; luckily you were always around to help me.

My colleagues at the Department of Dental Material Science, Toon de Gee, Jaqueline Rezende, Ahmed El-Zohairy, Giuseppe Isgro, Anne van Dalen, Peter Bolhuis, Raimond van Duinen and Rien van Paridon. Thank you for the coffee and cake that we shared at our ‘koffiekamer’. It was really pleasant to have an international group of colleagues; that made it easier to not feel a stranger.

Tineke Fortuyn, secretary of the Department of Oral Function. Thank you Tineke for making my first days in Amsterdam easier and helping me with the bureaucratic procedures to start a new life in this beautiful city.

My colleagues of the Department of Oral Function. Wim, Corine, James, Nico and Maurits; sharing the room with you was a nice welcome.

Marta Zogbi, my Argentinean friend and my Paraninfia. My dear Martita; thank you very much for the different and beautiful ways that you save me, I know that having a friend like you I could never feel alone. Thanks for the too short hours of long conversations; I really appreciate your willingness to listen to me, especially in the sad moments. Martita my best wishes to you and your beautiful family.

I thank all of my family. Unfortunately I cannot list all of them, because just my close family consists of 50 people, but I would like to send a very special thanks to the best girlfriend of my whole life, my dear Socorro. You have supported me along the whole journey and you have given me the ability to dream and fight to realize
Acknowledgments

these dreams. *Mi Linda Gordi*, I love and admire you very much. Also thanks to my brother Valdin and his family Jackie, Nicole and Andrea, although you were always far I have felt you very close.

Wulf Dicke, my husband, my friend, ‘mi compinche’. Dear Wulli, it is a wonderful pleasure to share my life with you, thank you for your unlimited patience, your encouragement and for the many beautiful ways that you show me your love. I know we have a long future together full of new experiences. This thesis is our success!!! I love you.

Finally, I am very pleased to share this beautiful moment with all of you, my readers.
