You will be contacted as soon as possible.
List of publications

The role of the N-terminal domain of photoactive yellow protein in the transient partial unfolding during signalling state formation.

van der Horst MA; van Stokkum IH; Crielaard W; Hellingwerf KJ
FEBS Letters 2001, 497, 1, 26-30

Transient exposure of hydrophobic surface in the photoactive yellow protein monitored with Nile red.

Hendriks J; Gensch T; Hviid L; van der Horst MA; Hellingwerf KJ; van Thor JJ
Biophysical Journal 2002, 82, 3, 1632-1643

Initial photo-induced dynamics of the photoactive yellow protein chromophore in solution.

Larsen DS; Vengris M; van Stokkum IHM; van der Horst MA; Cordfunke RA; Hellingwerf KJ; van Grondelle R
Chemical Physics Letters 2003, 369, 5-6, 563-569

PAS domains - Common structure and common flexibility.

Vreede J; van der Horst MA; Hellingwerf KJ; Crielaard W; van Aalten DMF
Journal of Biological Chemistry 2003, 278, 20, 18434-18439

Stark spectroscopy on photoactive yellow protein, E46Q, and a nonisomerizing derivative, probes photo-induced charge motion.

Premvardhan I.L; van der Horst MA; Hellingwerf KJ; van Grondelle R
Biophysical Journal 2003, 84, 5, 3226-3239

Initial characterization of the primary photochemistry of AppA, a BLUF-domain containing transcriptional anti-repressor protein from Rhodobacter sphaeroides: A key role for reversible intra-molecular proton transfer from the FAD chromophore to a conserved tyrosine?

Laan, W., Van der Horst, MA, Van Stokkum, IH, Hellingwerf, KJ
Photochemistry and Photobiology 2003, 78, 3, 290-297

Bacterial blue-light vision: Ultrafast Isomerization and Structural Changes in the Protein Pocket of the Photoactive Yellow Protein.

Biochemistry 2003, 42, 34, 10054-10059

Lack of negative charge in formation of the blue shifted intermediate of photoactive yellow protein prevents partial unfolding.

Derix, NM, Wechselberger, RW, Van der Horst, MA, Hellingwerf, KJ, Boelens, R., Kaptein, R., Van Nuland, N.
Biochemistry 2003, 42, 49, 15501-14506
The family of Photoactive Yellow Proteins, the Xanthopsins: From structure and mechanism of photoactivation to biological function.
Hellingwerf, KJ, Hendriks, J, Van der Horst, MA, Haker, A, Crielaard, W and Gensch, T

Van der Horst, MA and Hellingwerf, KJ
Accounts of Chemical Research 2004, 37, 1, 13-20

Measuring and Modeling Dynamical Changes in the Structure of Photoactive Yellow Protein.
Vreede, J., Van der Horst, MA, Kort, R., Crielaard, W. and Hellingwerf, KJ
Phase Transitions 2004, 77, 1-2, 3-20

Photoisomerization and Photoionization of the Photoactive Yellow Protein Chromophore in Solution.
Larsen, DS, Vengris, M, Van Stokkum, IHM, De Weerd, FL, Van der Horst, MA, Hellingwerf, KJ, Van Grondelle, R,
Biophysical Journal 2004, 86, 1-13

Electrostatic properties of p-coumaric acid derivatives of the Photoactive Yellow Protein chromophore determined from Stark spectroscopy and \textit{ab initio} calculations.
Premvardhan, LL, Buda, F, Van der Horst, MA, Hellingwerf, KJ and Van Grondelle, R

Controlled Reduction of Humidity Modulates the Photocycle of Photoactive Yellow Protein by Inducing a Short-cut Recovery Reaction.
Van der Horst, MA, Van Stokum, IHM., Dencher, NA, Hellingwerf, KJ
The Journal of Biological Chemistry, 2004, under review

A Balanced Bacterial Response to Illumination: Recent Insights from Genome Information.
Van der Horst, MA, Hellingwerf, KJ, Vreede, J, Laan, W, Crielaard, W, Palm, P and Oesterhelt, D
Submitted, 2004
