# Contents

List of Abbreviations v

1 Introduction 1
  1.1 E-Science Paradigm 2
    1.1.1 Definition and Characterization of E-Science Domains and Applications 3
    1.1.2 Target Problem Domains and Applications – Motivation 5
  1.2 Virtual Laboratory Solution 9
    1.2.1 Support Environments for Scientific Experimentations 10
    1.2.2 Virtual Laboratory 11
  1.3 Research Objectives 14
  1.4 Research Approach 16
  1.5 Base Projects 19
    1.5.1 The VLAM-G Project 19
    1.5.2 Other Related Projects 22
  1.6 Structure of the Thesis 23

2 Analysis of Requirements for Virtual Laboratories 25
  2.1 Approach for Requirements Analysis 26
  2.2 Virtual Laboratory Characterization 26
  2.3 Use Case Analysis 33
    2.3.1 Scientists Use Cases 34
    2.3.2 Domain Experts Use Cases 38
    2.3.3 Tool Developers Use Cases 39
    2.3.4 Administrators Use Cases 40
    2.3.5 ICT Developers Use Cases 41
  2.4 Classification of Requirements 42
  2.5 Analysis of User Requirements 44
    2.5.1 Scientists Requirements 44
    2.5.2 Domain Experts Requirements 47
    2.5.3 Tool Developers Requirements 48
    2.5.4 Administrators Requirements 48
  2.6 Analysis of Base ICT Infrastructure Requirements 49
## CONTENTS

4.5 Functionality Modelling for Collaboration, Administration and Security 154
  4.5.1 Collaboration Functionality ............................................. 155
  4.5.2 Administration Functionality ........................................... 156
  4.5.3 Security Functionality ................................................... 157
4.6 Methodology for Integrating New Domains and Applications in CEE 160
  4.6.1 Integration of a New Domain in CEE ................................. 160
  4.6.2 Integration of a New Application in CEE ............................ 161
4.7 Conclusions ........................................................................... 162

5 Management of Information in the VLAM-G Experimentation Environment 163
  5.1 VLAM-G Experimentation Environment – Revisited .................... 164
    5.1.1 Experiment Model of the VLAM-G .................................... 164
    5.1.2 VLAM-G User Environment: Front-End ............................. 164
    5.1.3 Experimentation in the VLAM-G ....................................... 167
  5.2 VIMCO: Virtual Laboratory Information Management for Cooperation 169
  5.3 The VIMCO Architecture .................................................... 170
    5.3.1 VIMCO Communication Servers ..................................... 171
    5.3.2 VIMCO Core Functionality Server .................................. 172
    5.3.3 VIMCO DB Servers ...................................................... 177
    5.3.4 Implementation of VIMCO ............................................. 177
  5.4 VIMCO Databases .............................................................. 178
  5.5 Functionality/Services Provided by VIMCO ............................. 183
    5.5.1 Overview of the VIMCO API .......................................... 184
    5.5.2 Services for Accessing VIMCO ........................................ 185
    5.5.3 Services for Session, User and Access Rights Management .... 188
    5.5.4 Services for Managing Experiment-Related Information ....... 192
  5.6 Conclusions ........................................................................... 196

6 The DNA Microarray Application Case 197
  6.1 DNA Microarray Technology and Microarray Experiments ............ 198
  6.2 A Motivating Microarray Experiment Scenario .......................... 199
  6.3 The DNA Microarray Application .......................................... 201
    6.3.1 The Expressive System .................................................. 201
    6.3.2 Developing and Integrating the Expressive System ............... 201
    6.3.3 Data Loading ............................................................. 214
    6.3.4 Representing Different Types of Experiments ...................... 214
  6.4 Using the Expressive System ............................................... 215
  6.5 Conclusions ........................................................................... 216

7 Conclusions 217
  7.1 Overview of the Proposed Approach ..................................... 217
  7.2 Summary of Thesis Achievements ......................................... 219
  7.3 Evaluation and Comparison of the Proposed VLAM-G/VIMCO Approach ...................................................... 221
