## Contents

Preface........................................................................................................ iii

1 Introduction
   1.1 Modelling as means of problem-solving ........................................ 1
   1.2 Conceptual Modelling using Qualitative Reasoning ......................... 2
   1.3 Graphical Representations in Problem Solving .............................. 3
   1.4 Support in articulating knowledge .................................................. 4
   1.5 Research Goals ............................................................................. 4
   1.6 Outline of the Thesis .................................................................... 4

2 Designing a Model Building Environment .......................................... 7
   2.1 Introduction ................................................................................. 7
   2.2 Analysing the Model Building Process ........................................ 10
   2.3 Designing Modelling Tools .......................................................... 28
   2.4 Summary ...................................................................................... 45

3 The HOMER Experiment .................................................................... 49
   3.1 Introduction ................................................................................. 49
   3.2 Subject Matter: The U-Tube System ............................................ 51
   3.3 HOMER Environment ................................................................. 51
   3.4 Method ......................................................................................... 57
   3.5 Experiment Results ..................................................................... 58
   3.6 Summary and Concluding Remarks ............................................. 76

4 Enabling Support in Building Models ............................................... 79
   4.1 Introduction ................................................................................. 79
   4.2 Related Educational Software ..................................................... 80
   4.3 Lessons learned regarding interface and interaction design .......... 90
   4.4 Feedback on errors ..................................................................... 93
   4.5 Lessons learned regarding feedback on errors ............................ 96
   4.6 Support Designing for the Learning Process ................................ 97
   4.7 Our approach to the new support system .................................... 99
   4.8 Discussion and Conclusions ....................................................... 106
