## Preface

### 1 Introduction
1.1 Modelling as means of problem-solving .......................... 1
1.2 Conceptual Modelling using Qualitative Reasoning .......... 2
1.3 Graphical Representations in Problem Solving ............... 3
1.4 Support in articulating knowledge .................................. 4
1.5 Research Goals ......................................................... 4
1.6 Outline of the Thesis ................................................. 4

### 2 Designing a Model Building Environment
2.1 Introduction ................................................................. 7
2.2 Analysing the Model Building Process ............................ 10
2.3 Designing Modelling Tools ............................................ 28
2.4 Summary ........................................................................ 45

### 3 The HOMER Experiment
3.1 Introduction ................................................................. 49
3.2 Subject Matter: The U-Tube System .............................. 51
3.3 HOMER Environment ................................................... 51
3.4 Method ........................................................................ 57
3.5 Experiment Results ...................................................... 58
3.6 Summary and Concluding Remarks ............................... 76

### 4 Enabling Support in Building Models
4.1 Introduction ................................................................. 79
4.2 Related Educational Software ....................................... 80
4.3 Lessons learned regarding interface and interaction design .... 90
4.4 Feedback on errors ...................................................... 93
4.5 Lessons learned regarding feedback on errors ............... 96
4.6 Support Designing for the Learning Process .................. 97
4.7 Our approach to the new support system ....................... 99
4.8 Discussion and Conclusions ........................................ 106

## Contents

- Preface: iii
- 1 Introduction
  - 1.1 Modelling as means of problem-solving: 1
  - 1.2 Conceptual Modelling using Qualitative Reasoning: 2
  - 1.3 Graphical Representations in Problem Solving: 3
  - 1.4 Support in articulating knowledge: 4
  - 1.5 Research Goals: 4
  - 1.6 Outline of the Thesis: 4
- 2 Designing a Model Building Environment
  - 2.1 Introduction: 7
  - 2.2 Analysing the Model Building Process: 10
  - 2.3 Designing Modelling Tools: 28
  - 2.4 Summary: 45
- 3 The HOMER Experiment
  - 3.1 Introduction: 49
  - 3.2 Subject Matter: The U-Tube System: 51
  - 3.3 HOMER Environment: 51
  - 3.4 Method: 57
  - 3.5 Experiment Results: 58
  - 3.6 Summary and Concluding Remarks: 76
- 4 Enabling Support in Building Models
  - 4.1 Introduction: 79
  - 4.2 Related Educational Software: 80
  - 4.3 Lessons learned regarding interface and interaction design: 90
  - 4.4 Feedback on errors: 93
  - 4.5 Lessons learned regarding feedback on errors: 96
  - 4.6 Support Designing for the Learning Process: 97
  - 4.7 Our approach to the new support system: 99
  - 4.8 Discussion and Conclusions: 106
5 Design and Implementation of MOBUM 109
  5.1 Introduction ........................................... 109
  5.2 System Architecture .................................... 110
  5.3 User Interface .......................................... 116
  5.4 User interface implementation .......................... 129
  5.5 Discussion and Conclusions .............................. 139

6 MOBUM Experiment 141
  6.1 Introduction ........................................... 141
  6.2 MOBUM Evaluation ........................................ 142
  6.3 Results of the MOBUM Evaluation ......................... 144
  6.4 Comparison Study between MOBUM and HOMER ............ 157
  6.5 Discussion and Conclusions .............................. 168

7 Conclusions and Discussion 171
  7.1 Main Results ........................................... 171
  7.2 Future Developments ..................................... 175

A The Scuba Diving Model 177
  A.1 Hierarchy ................................................ 177
  A.2 Model Fragments .......................................... 177
  A.3 Scenarios ................................................ 185
  A.4 Quantity Spaces ......................................... 187

B Homer Experiment 189
  B.1 Assignment - Part 1 ...................................... 189
  B.2 Assignment - Part 2 ...................................... 189
  B.3 Reflection with the model builder ....................... 194

C MOBUM Experiment 195
  C.1 Novices assignment - Garfield's weight ................. 195
  C.2 Experts assignment: Construct a simulation model of a U-Tube 196
  C.3 Comparison Study: MOBUM - HOMER ...................... 196

Summary 217

Samenvatting 221
