Contents

Chapter 1: General Introduction:
The thyroid gland, pediatric malignancies and the effects on the thyroid gland during and after treatment for childhood cancer.
Outline of the thesis 9

Part 1: Thyroid damage after treatment with $^{131}$I-MIBG

Chapter 2: High incidence of thyroid dysfunction despite prophylaxis with potassium-iodide during $^{131}$I-meta-iodobenzylguanidine-treatment in children with neuroblastoma.
Cancer, 2002, April 1, Vol 94 (7) ; 2081-2089 91

Chapter 3: Endocrine late effects after multi-modality treatment, including $^{131}$I-MIBG, for neuroblastoma.
Submitted for publication 109

Chapter 4: Improved radiation protection for the thyroid gland against $^{123/131}$I-MIBG in children with neuroblastoma, using thyroxine, methimazole and potassium-iodide.
Cancer, 2003 July 15; Vol 98(2):389-96. 127

Addendum 1: Update of chapter 4 145
Addendum 2: Protocol for thyroid protection during administration of $^{123/131}$I-MIBG 149
Addendum 3: Thyroid protection with KI, methimazole and thyroxine during radio-MIBG after closure of the study 151

Part 2: Thyroid damage after external radiation therapy

Chapter 5: Activity-index of thyroid cells in relation to TSH as radiation effect
Journal of Endocrinological Investigation, in press 157

Chapter 6: Endocrine intervention during irradiation does not prevent damage to the thyroid gland
Submitted for publication 175

Part 3: Consequences of thyroid carcinoma during childhood

Chapter 7: Frequent adverse events after treatment for childhood-onset differentiated thyroid carcinoma: a single institute experience
European Journal of Cancer 2004 July 40 (11) 1743-1751 195
Chapter 8: Disseminated medullary thyroid carcinoma despite early thyroid surgery in the MEN-2A syndrome. *Thyroid, in press*

**Part 4:** Thyroid hormones during and after chemotherapy 221

Chapter 9: The changing thyroid hormone state in children receiving chemotherapy. *Clinical Endocrinology, in press*

Chapter 10: No effect of chemotherapy on thyroid (axis) damage in addition to radiotherapy. *Journal of Clinical Endocrinology and Metabolism 2003 August; 88(8):3657-63.*

**Part 5:** Prevention of damage to the thyroid gland: review of the literature, general discussion and future perspectives 257

Chapter 11:
11a Effectiveness of preventive strategies for thyroid damage due to radiation therapy. Part I: Review of human studies *To be submitted for publication*

11b Effectiveness of preventive strategies for thyroid damage due to radiation therapy. Part II: Review of animal studies *To be submitted for publication*

Chapter 12: General Discussion & Future Perspectives 365

**Appendices** 391
