Thanks!

First of all, I would like to thank my supervisor, Peter Bolhuis, for giving me the opportunity to start this PhD project at the University of Amsterdam. Peter, I learned a lot during these four years. Your guidance, patience and expertise in protein simulations were of exceptional value to me. I would like to give my best thanks to Jocelyne Vreede for scientific help on a daily basis. Last chapter of this thesis was written in close collaboration with Jocelyne. She is also responsible for the translation of the Summary. Jocelyne, thanks for that! I am particularly grateful to Alessandro Laio and Baron Peters for supplying the code of Metadynamics and Likelihood Maximization. Special thanks to Pawel Ciemniewski, who designed the cover of this thesis. I would also like to acknowledge NWO, De Nederlandse Organisatie voor Wetenschappelijk Onderzoek, for financial support.

I would like to thank, my office mates and colleagues, Elske, Arjen, Renée, Bas and Edith for their support from the very beginning of my stay in Amsterdam. Especially, I bow before Elske, whose help with Dutch language, extensive knowledge of Dutch bureaucracy and general tips on the life in the Netherlands were priceless! Big thanks, Elske! Special thanks to Gooitzen, for always being ready to react to the cluster emergencies and unexpected disk overflows (Oops! Jarek did it again?). Finally, I would like to mention the whole MOLSIM group that made the everyday work at UvA much more enjoyable: Annalisa, Arjen, Bas, Berend, Bernd, Christopher, Edith, Elske, Erika, Evert, Evert Jan, Jasper, Jocelyne, Jutta, Lizhe, Marieke, Peter, Ranieri, Tim. Thank you all for your kindness.
