**Contents**

Preface v

1 Introduction 1
   1.1 Background ........................................... 1
   1.2 Research questions ..................................... 4
   1.3 Approach and outline .................................... 5

2 The role of information gain in menu optimization 7
   2.1 Introduction .......................................... 7
   2.2 Related work .......................................... 9
   2.3 Problem setting ........................................ 11
   2.4 Study 1 ............................................... 13
   2.5 Study 2 ............................................... 17
   2.6 Study 3 ............................................... 28
   2.7 Conclusions and discussion .............................. 35

3 Navigation behavior models for link structure optimization 37
   3.1 Introduction .......................................... 37
   3.2 Navigation behavior models of link structure optimization methods .... 39
   3.3 A framework for navigation behavior models .................. 44
   3.4 Selecting navigation behavior models for hierarchical menus .......... 53
   3.5 Menu optimization ...................................... 64
   3.6 Case study ............................................ 69
   3.7 Conclusions and discussion ................................ 75

4 Discovering stages in web navigation for problem-oriented navigation support 79
   4.1 Introduction .......................................... 79
   4.2 The SeniorGezond site ................................... 81
   4.3 Related work .......................................... 84
   4.4 The stage discovery algorithm ............................. 86
## Contents

4.5 Discovering stages for the SeniorGezond site ........................................ 93  
4.6 Discovering stages for a hardware comparison site .................................... 96  
4.7 Analysis of the sensitivity of the method .................................................. 100  
4.8 Building problem-oriented navigation structures ........................................ 105  
4.9 Conclusions and discussion ........................................................................ 109  

5 A semi-automatic usage-based method for improving hyperlink descriptions 111  
5.1 Introduction .................................................................................................. 111  
5.2 Related work ................................................................................................. 113  
5.3 Problematic link descriptions ........................................................................ 114  
5.4 Link description classification algorithm ...................................................... 117  
5.5 Evaluation .................................................................................................... 125  
5.6 Conclusions and discussion ........................................................................... 132  

6 Conclusions 135  
6.1 Main contributions ......................................................................................... 135  
6.2 Reflections on the research questions ........................................................... 136  
6.3 Discussion and future research ..................................................................... 141  

A Example assignments from the stage discovery experiments 143  
A.1 SeniorGezond (translated from Dutch) ....................................................... 143  
A.2 Hardware comparison site ............................................................................ 143  

B Example assignments from the link description experiment 144  
B.1 SeniorGezond (translated from Dutch) ....................................................... 144  
B.2 Reumanet (translated from Dutch) .............................................................. 144  
B.3 Leiden (translated from Dutch) ..................................................................... 144  

Bibliography 145  
Summary 155  
Samenvatting 159
