This is my dissertation "Essays on European Bond Markets". It comprises four years of work at the Tinbergen Institute and the Finance group of the University of Amsterdam. Many persons have contributed in different ways in establishing this work. First of all, I want to thank my supervisor professor Frank de Jong. The main task of a Ph.D. supervisor is to guide his students in the long road of academic thinking. Challenge the student to come up with arguments, proofs and to guide in the vast literature of financial economics. In my case, it was also important to have someone who was willing to spend his time in improving my academic writing skills. Frank did a tremendous job and I consider myself to be lucky having Frank as my supervisor. He also gave me the opportunity to teach Investments and Financial Markets and I enjoyed teaching these courses very much. I am sure that the acquired skills will be useful in the years to come. I would like to thank the members of the committee for their precious time in evaluating this thesis and especially Peter Boswijk, Enrico Perotti and Barbara Rindi. Although Peter Boswijk was not involved in this thesis, the fundament of my empirical work was laid in the classes of econometrics during my years as an undergraduate student. Peter also recommended me to the finance group when I decided to pursue a Ph.D. in Finance and I thank him for that. Enrico Perotti was directly involved in the early stages of my Ph.D. His academic knowledge and overview of the financial literature makes him a true economist. More importantly, he quickly understood that my research interest did not lie in his vast field of interests and I am grateful to him for allowing me to continue my research under Frank de Jong. A problem faced by most students when working on an empirical paper is to obtain an interesting dataset. For me, that was barely a problem as Barbara was willing to share her MTS dataset with me. This led to a significant leap forward and laid the fundamentals for this dissertation.

In the early stage of my Ph.D., I had the privilege to share my time at the Tinbergen institute with Boris, Sylvia, Ibolya, Mauro, Silva. Neeltje "Zwarte Piet".
Matthijs "Sinterklaas" van Veelen and Marian Duppen. In a later stage, the finance group at the University of Amsterdam offered me an enjoyable environment and I thank Erik, Pepijn, Armin, Arnaud, Stijn, Dirk, Ludo, Dinara, Lev, JiaJia, Gert-Jan, Marcel and Jeroen. I also enjoyed worked together with Henk Koster and Liang Zou during those periods where we had to teach investment and portfolio theory. Special thanks go to Antoine van der Ploeg, Otto van Hemert and Joost Driessen. Without any doubt, working on my Ph.D. would be more complicated without a true friend like Antoine. I had the privilege to share my thoughts with him and his knowledge of econometrics and stochastic calculus has helped me tremendously in finishing my papers. More importantly, many of our time together ended often in discussing the real importance in life. Thank you Antoine! I also had the pleasure to share my room with Otto van Hemert. We had lots of fun discussing everything except mathematics, assumptions and statistics. We always had a good laugh about the things that happened during the weekends when I was spending my time with my wife while he was doing everything else. Most important, I am glad that he was not forcing his music preferences like "Tears for Fears: Sowing the Seeds of Love" upon me. Special thanks to Joost Driessen for sharing his knowledge of good quality almond cake "koekje moet vochtig van binnen zijn" and kiwi fruit "zacht is niet lekker".

During my Ph.D., I shared some of my thought with some friends from the investment community. My old mate Iwan "Inflation-linked" Lont, Ron "Kreeft en champagne is een uitstekende combinatie" Bruggink, Falco "Wat doet de bund future?" van Tartwijk, Michiel "Caps and floors" Smits, Wilfried "Yiu!...dit wijntje is wel erg lekker!" van Hulten, Marcel "XXX, mijn telefoon ligt in de taxi" de Bever and Marc "Ben bezig met een hoofdstukje" Friedel. They were always willing to put up a discussion with me while listening to my view of finance, no matter how different it was from theirs. We had a great time with lavish dinners that I cooked when Wilfried was opening (not allowed!) my only bottle of Château la Fleur Petrus 1982 while Falco was finishing my last bottle of Mouton Rothschild 1995.
Talking with you guys was a valuable lesson for me and I am sure that the future will bring more passionate discussions about finance. Clearly, I still have to convince you guys about the importance of a good quality wristwatch. Thanks to these guys, I recognize the importance of having a garden where I can bury the wines, cognac and whiskey when giving a party. Outside finance and academia, my friends were equally important. My dearest squash mates Ted, Kuen, Fai and my 'outside squash mate' Job. I realize that a squash court is the best place to handle any frustration. Although they never understood the things I was working on, they accepted me during times when my thoughts were closer to t-statistics than the t-spot. I have enjoyed the time spent on the squash court and I hope that we can continue to play in the future. Thank you King Man, Chi-Mei, Hung, Joyce, Gloria, Yvonne, Colin, Yin, Shuet, Wing Yee, Florence, Kit en Yemie for all those lovely evenings spending time drinking wine and eating (too) much wonderful food. I owe you guys a dinner (again!).

The core of happiness lies in a stable family. I am lucky to have my brother "il quattro F", also known as Fast Finger Fender Fai, Elisa and Fun close to me. I also thank my family in Hong Kong, the family Tam, my wife's family and the Chinese christian community in Amsterdam. They have been like a second home in all these years. I thank my wife Yen for sharing her life with me and I am sorry for those moments when my thoughts where closer to my computer algorithms but I am sure that our future together will make up for this. Your love, support and encouraging faith has motivated me to go the extra mile. Finally, I would like to thank my parents. The older I become, the more I realize that it was not easy for them to build up a new life as immigrants outside Hong Kong with 3 kids. Their achievement in building up so much with so little is a true and outstanding performance. I therefore dedicate this work to them.

Yiu Chung
Amsterdam. April 2005
