General rights

It is not permitted to download or to forward/distribute the text or part of it without the consent of the author(s) and/or copyright holder(s), other than for strictly personal, individual use, unless the work is under an open content license (like Creative Commons).

Disclaimer/Complaints regulations

If you believe that digital publication of certain material infringes any of your rights or (privacy) interests, please let the Library know, stating your reasons. In case of a legitimate complaint, the Library will make the material inaccessible and/or remove it from the website. Please Ask the Library: <http://uba.uva.nl/en/contact>, or a letter to: Library of the University of Amsterdam, Secretariat, Singel 425, 1012 WP Amsterdam, The Netherlands. You will be contacted as soon as possible.

List of Tables

3.1	Details about the LoLaLi map.	37
3.2	A summary of connections between the categorial grammar (a framework) and other areas.	40
4.1	Composition of the groups of undergraduate students (UG) and masters students (MSc) on the basis of gender (M/F) and native language.	64
4.2	Questions on computer literacy of the participants in the study. Multiple answers were allowed.	66
4.3	Summary of usage of electronic resources.	67
4.4	Summary of results for the question: “Assign a typed relation to pairs of topics.” More than one answer was possible.	73
4.5	Summary of the questions about searching and browsing.	75
5.1	Details about the corpus.	93
5.2	Details about the ground truth for segmentation.	95
5.3	Values of precision and recall on topic breaks for the four segmentation methods. TextTiling and C99 are applied with all parameters set to their default values. Best scores are in boldface	98
5.4	Tuning parameters for TextTiling. Best scores are in boldface	99
5.5	Tuning parameters for C99. Best scores are in boldface	99
5.6	Summarizing the results for the two structural segmentations, and the best performing versions of TextTiling and C99.	100
6.1	Summary values for all collections of segments, across all queries, using tf.idf. Highest scores per measure are in boldface	110
6.2	Summary values for all collections of segments, across all queries, using OKAPI. Highest scores per measure are in boldface	111
