Acknowledgement

Prof. Dr. Albert Feilzer:
Albert, what to say, he was my promoter. Albert I thank you for your support and constructive criticism at any time. With each visit in Amsterdam, I was astonished about the calm and beneficial environment at ACTA – there I learnt much about the culture to discuss and how to question. I have great respect for your unique work for dental materials - please maintain on your efforts to conserve and strengthen this field of research.

Prof. Dr. Jef van der Zel:
Jef I am thankful that you gave the idea and made the contact to ACTA. I enjoyed each meeting and the extensive discussion about ceramics.

Prof. Dr. Michael Behr:
Michael, thank you for your support and cooperation over all the years.

Reading commission:
Thank you all for reading and judging my thesis. It is always an honour to be judged by experienced researchers. For me, it was a great challenge.

Dr. Lothar Völkl:
You gave the impulse to deal with zirconia. Thank you for your confidence in our work and the frequent, already amicable discussions on zirconia.

Dr. Cees Kleverlaan for reading, improving the layout and a lot of other work with this thesis.

Dr. Carola Kolbeck:
Carola, thank you for your time and your friendship – I enjoy it being your colleague.

Prof. Dr. Gerhard Handel, thank you for your very important support. Thank you too, for providing the basis of our research and your willingness to listen to our problems at any time.

Thank to all dentists and dental technicians accompanying and contributing to this work: I liked to exchange information about zirconia restorations – I hope that it helped me not to starve in the ivory tower.

All readers, who may have no fun with this work, but I hope they will find some interesting impulses on dental materials.

My wife
