You will be contacted as soon as possible.

The background of the cover is a fluorescence microscopy image of neural tissue. It features a complex network of fibers and cell bodies. A prominent structure on the left side is stained in a bright red color, while other fibers and cell bodies are stained in a bright cyan or light blue color. The overall appearance is that of a dense, interconnected neural network.

**Activity- and pharmacology-
dependent modulation of adult
neurogenesis in relation to
Alzheimer's disease**
