If you believe that digital publication of certain material infringes any of your rights or (privacy) interests, please let the Library know, stating your reasons. In case of a legitimate complaint, the Library will make the material inaccessible and/or remove it from the website. Please Ask the Library: <http://uba.uva.nl/en/contact>, or a letter to: Library of the University of Amsterdam, Secretariat, Singel 425, 1012 WP Amsterdam, The Netherlands. You will be contacted as soon as possible.

Content

1.	<i>Introduction to polymeric networks and their analysis</i>	
1.1.	Introduction to polymers	2
1.2.	Polymeric networks	4
1.2.1.	Chemically vs. physically cross-linked networks	4
1.2.2.	Types of chemically cross-linked networks	4
1.2.3.	Network imperfections	8
1.3.	Analysis of polymeric networks	10
1.3.1.	Direct approach	11
1.3.1.1.	Physical/mechanical measurements	11
1.3.1.2.	Spectroscopic approaches	13
1.3.1.3.	Analysis of the starting materials	16
1.3.2.	Indirect approach	17
1.3.2.1.	Pyrolysis	18
1.3.2.2.	Chemical degradation	20
1.3.2.3.	Model compounds	22
1.4.	Scope of the thesis	22
2.	<i>Characterisation of UV-cured acrylate networks by means of hydrolysis followed by aqueous size-exclusion combined with reversed-phase chromatography</i>	
2.1.	Introduction	32
2.2.	Experimental	36
2.3.	Results and discussion	39
2.3.1.	Analytical results	39
2.3.1.1.	Analysis of the purity of the starting materials	39
2.3.1.2.	Determination of k_{cl} and XL_c by SEC-LC	41
2.3.1.3.	Analysis of extractables	46
2.3.2.	Chemical network structure	47
2.3.3.	Network parameters	51
2.3.4.	Comparison of cross-link densities with s-NMR and DMA data	53
2.4.	Conclusion	56
3.	<i>Integrated approach to characterise the styrene/di-methacrylate network structure</i>	
	<i>Influence of styrene and radical-transfer agent</i>	
3.1.	Introduction	60
3.2.	Experimental	64

3.3. Results and discussion	66
3.3.1. Characterisation of the starting materials by LC-UV-MS and MALDI-TOF-MS	66
3.3.2. Curing of the network	69
3.3.3. Glass transition and degradation temperature of network	72
3.3.4. Analysis of the polymeric backbone	73
3.4. Chemical network structure	80
3.5. Conclusion	85
4. <i>Hydrolytic degradation of poly(D,L-lactide-co-glycolide 50/50)-di- acrylate network as studied by liquid chromatography–mass spectrometry</i>	
4.1. Introduction	90
4.2. Experimental	93
4.3. Results	96
4.3.1. Chemical composition of poly-(D,L-lactide-co- glycolide 50/50)-di-acrylate	96
4.3.2. Weight loss and pH change during the degradation	97
4.3.3. Liquid chromatography – mass spectrometry analysis of the sol fraction	97
4.3.3.1 Analysis of oligomers and residual photo- initiator released	98
4.3.3.2 Analysis of polyacrylate chains released	103
4.4. Discussion	107
4.5. Conclusion	111
5. <i>Low-molecular-weight model study of peroxide cross-linking of EP(D)M rubber using gas chromatography- mass spectrometry Combination reactions of alkanes</i>	
5.1. Introduction	116
5.2. Experimental	120
5.3. Results	122
5.3.1. Qualitative analysis of alkane/peroxide reaction products	122
5.3.1.1. Identification of DCP decomposition products	122
5.3.1.2. Identification of alkane reaction products by GC–MS and GC×GC–MS	123
5.3.1.3. Identification of alkane reaction products by QSPR	129

5.3.2. Quantitative analysis of alkane reaction products by GC-FID	134
5.4. Conclusion	136
6. <i>Low-molecular-weight model study of peroxide cross-linking of EPDM rubber using gas chromatography- mass spectrometry</i>	
<i>Addition and combination</i>	
6.1. Introduction	142
6.2. Experimental	145
6.3. Results	147
6.3.1. Qualitative analysis of alkane/alkene/DCP reaction products	147
6.3.2. Quantitative analysis of alkane/alkene/DCP reaction products	155
6.3.3. Cross-linking mechanism of EPDM	159
6.4. Conclusion	161
7. <i>Characterisation of UV-cured acrylate networks as studied by thermal degradation methods</i>	
7.1. Introduction	164
7.2. Experimental	169
7.3. Results	174
7.3.1. DSC and TGA of cross-linked acrylates	174
7.3.2. Pyrolysis-MS of cross-linked acrylates	176
7.3.3. MALDI-TOF-MS of cross-linked acrylates	183
7.3.4. Pyr-LC-MS of cross-linked acrylates	187
7.3.4.1. Off-line Pyr-LC-MS	187
7.3.4.2. On-line Pyr-LC-MS	190
7.4. Discussion and conclusion	194
<i>Summary</i>	203
<i>Samenvatting</i>	207
<i>Dankwoord</i>	211
<i>Bibliography</i>	213
